Sekem A Sustainable Community In The Egyptian Desert:

Sekem Ibrahim Abouleish, 2005 The Egyptian desert can be a hostile place Yet in 1977 Dr Ibrahim Abouleish founded a new agricultural and social settlement on seventy hectares of desert land in Belbes 60 km north east of Cairo The Sekem initiative was born Dr Abouleish's goals were to build a new type of community His vision was for a farm which grew biodynamic crops and plants out of the harsh desert sand Where the workers and residents were given holistic primary health care Where their children were well educated in the sciences A place which could sell its wares and be self sufficient and self sustaining A place where Islamic religion and Western technology could come together in harmony Nearly thirty years later and Sekem has gone from strength to strength In 1981 it shipped its first medicinal herbs to the USA by 2004 it oversaw a network of over 800 farms across Egypt and the Sudan producing high quality organic crops herbs fruits and vegetables Its mobile health units work with local rural populations and it has brought about real social change This is the story of Sekem the original vision the challenges and hard work and the eventual successes in Ibrahim Abouleish's own words Stunningly illustrated with colour photographs throughout **The Sekem Effect** HELMY. ARLT ABOULEISH (CHRISTINE.), Christine Arlt, 2025-05-29

cultural if not a moral guises There are real and many alternatives to the economic mainstream The trouble is of course that they are hidden from us In *Integral Economics* Ronnie Lessem and Alexander Schieffer pave the way for a sustainable approach to economics building on the richness of diverse economic approaches from all over the globe By introducing the most evolved economic perspectives and bringing them into creative dialogue they argue that neither individual enterprises nor wider society will be transformed for the better without a new economic perspective Here they introduce a comprehensive framework based on the same Four Worlds model that is applied to enterprise and research in their earlier works Given the richness of even mainstream economic theory reviewed in this book let alone the variety of alternative approaches introduced it is frustrating that policymakers and business practitioners are impoverished by a lack of apparent economic choice between a seemingly failing capitalism and an already failed communism The villains of the piece in relation to this lack of choice are not so much the financial community and governments though they do have much to answer but the schools of economics and the business schools that have created the very social ethos the philosophical principles and the mathematical models that influence events *Integral Economics* is partly addressed to academics and students in those very schools who have either realized the error of their ways or less dramatically are curious to explore whether our businesses and communities could be run in a different way It will be welcomed by informed senior practitioners eager to understand the current rethink of economic theory and practice and to discover how to position themselves their organizations and their society within a new framework

Profits and Sustainability Geoffrey Jones, 2018-01-26 Are profits and sustainability compatible This book brings unique perspectives to this key debate by exploring the history of green entrepreneurship since the nineteenth

century and its spread globally in industries including renewable energy organic food natural beauty ecotourism recycling architecture and finance The book uses the lens of the extraordinary and often eccentric men and women who defied convention and imagined that business could help save the planet rather than consume it The social and religious beliefs that drove many of these individuals are explored as the book looks at how they overcame huge obstacles to execute their strategies The green entrepreneurs seen here are shown to have created new markets and industries and driven innovations in sustainable practices even at times when most consumers and governments marginalized the entire subject The struggles of early pioneers appear to have been rewarded by the growth of environmental awareness among consumers business leaders and others in recent years but the Earth's environmental health continues to deteriorate If profits and sustainability have proved challenging to reconcile the book argues that one reason was how they were both defined

Digging Deeper Dietmar Sternad, James J. Kennelly, Finbarr Bradley, 2017-09-08 What is the primary purpose of business The standard answer is making profits but some visionary entrepreneurs and leaders fundamentally disagree Instead of just making money they choose instead to dig deeper and make a difference through creating real value improving the lives of others even as they find deeper meaning in their own These leaders build enterprises that provide identity and a sense of purpose create positive relationships and a place to learn and thrive embed sustainability in all that they do and strive to improve the quality of life of all of their stakeholders Although not their primary focus they also make healthy profits as their unique approach to value creation provides them with a sustainable competitive edge Digging Deeper is a book full of inspiring stories that illustrate that there is an alternative to a myopic and narrow capitalism that trades in inequalities exploitation collective burnout and negative consequences for our shared natural environment Remarkable examples from all over the world vividly demonstrate how enterprises can create real value through focusing on what the authors call the 6 Ls long term orientation lasting relationships local roots limits recognition developing a learning community and taking leadership responsibility seriously in its very best sense Digging Deeper liberates the term value from the tight chains in which the global financial community has bound it and demonstrates that businesses can contribute to a better life for all if their leaders can go beyond viewing enterprises as single purpose money making machines and develop purpose driven enterprises that create real value for all

Integral Renewal Ronnie Lessem, Alexander Schieffer, 2016-03-09 In 2010 Ronnie Lessem and Alexander Schieffer published their seminal work on Integral Research and Innovation whereby they identified the four R's relational and renewal reason and realization based research paths that altogether encompass the major qualitative research methods and methodologies Within each path they identified a trajectory from origination to transformation via foundation and emancipation However these paths underlying the research process conventionally termed method were disconnected from the integral economic and enterprise content conventionally termed literature with which they were concerned In this book *Integral Renewal* they seek to remedy such in two major respects As transformative masters and PhD programs are focused on the Global South where the vast majority of the world's population is based as well as those developmental agencies focused on such the great majority of the people with whom the authors deal select the relational research path and

the path of renewal over and above the paths of reason and realization The focus of this book will be on these two paths of integral research now interconnected with integral enterprise and economics Uniquely the authors pursue research and innovation in a systematic way In that respect while their prior Integral Research book still provides the research foundation for the four southern and eastern northern and western paths this book will focus on the former two relational southern and renewal eastern from the combined perspectives of research process and economic and enterprise content *Science, Technology and Society* Giampietro Gobo,Valentina Marcheselli,2023-01-09 Science Technology and Society An Introduction provides students with an accessible overview of the interdisciplinary field of Science and Technology Studies STS The discipline breaks down traditional conceptions of knowledge as universal neutral and ahistorical and takes a more critical approach to science and technology as social embedded phenomena This comprehensive textbook makes use of unique examples and case studies to illustrate theoretical debates and concepts In addition the reader acquires a unique vision of contemporary issues such as the power of algorithms the mystification of fake news the role of experts within the decision making process for example Each chapter incorporates pedagogically rich features including interactive discussion points to be used individually or in class as prompts for debate Spiritual Capital Samuel D. Rima,2020-07-26 Presenting a thorough comprehensive theory of spiritual capital based on solid academic research Spiritual Capital serves to reinforce and amplify the notion of a moral economic core that is beginning to feature in contemporary economic arguments In this rare major work wholly dedicated to the subject of spiritual capital Sam Rima explains the desperate need for revolutionary and transformational thinking in the area of economic policy and practice and makes the case for a new moral foundation to business and economics that directly addresses today s financial and business crisis Writing in an accessible style and drawing on examples from several continents Rima explains spiritual capital theory in terms of the resources needed for its creation how it is formed how it can be invested and what the return on investment can be The book provides practical tools for measuring a personal or organizational store of spiritual capital along with clear guidelines on how to engage in spiritual capital formation These will benefit business leaders interested in developing viable and sustainable enterprises capable of avoiding the disconnection between economic policy and social reality There are also recommendations here for policy makers regarding the macro application of spiritual capital theory This important contribution to Gower s Transformation and Innovation Series will appeal to business leaders and policy makers academicians and students in the fields of sociology theology and economics and anyone interested in social and economic justice issues social innovation and corporate social responsibility
