

I. Introduction:

A. Hook: Many young boys and girls struggle with motor skills and academic success and organized sports may be the answer to solving these issues.

B. Thesis statement: Studies have shown that organized sports programs have a significant impact on the physical and mental health of students, leading to improved motor skills, academic performance, and a positive outlook on self-image.

C. Background information: Organized sports have been shown to have many physical and mental health benefits for adolescents and young adults. Emerging research is now beginning to explore the effects of participation in sports, measured through daily or weekly physical activity interventions in teenagers' weekly schedules, on motor skills. Research is also exploring how participation in sports helps with aspects not directly linked to physical activity, like academic success and one's self-image. Motor skills are specific movements of the body's muscles that allow us to perform certain tasks such as writing, running, and riding a bicycle (Lehman, 2021). Body coordination is the movement of multiple body parts to act such as walking and playing sports (Coordination Exercises, 2022). Academic performance can be defined as how well students can understand school material and how well they perform in the assessments of their understanding, like in exams. Self-image is the view a person has of themselves and is related directly to self-esteem and confidence.

C1. Reference to Body Paragraph #1: Emerging research is now beginning to explore the effects of participation in sports, measured through daily or weekly physical activity interventions in teenagers' weekly schedules, on motor skills.

C2. Reference to Body Paragraph #2: Academic performance can be defined as how well students can understand school material and how well they perform in the assessments of their understanding, like in exams.

C3. Reference to Body Paragraph #3: Research is also exploring how participation in sports helps with aspects not directly linked to physical activity, like academic success and one's self-image. Self-image is the view a person has of themselves and is related directly to self-esteem and confidence.

II. Body Paragraph #1:

A. Topic Sentence: Many studies have shown improved motor skills and coordination with increased physical activity and intervention of daily tasks with sports.

B1. Research (with citation): However, recent intervention studies have shown a positive correlation between sports and motor skills. These studies indicated that "motor skill proficiency measured in middle childhood is
