The Bloomsbury Handbook of Diversity, Crises and Transformative Leadership in Higher Education Yusef Waghid, Mary Drinkwater, 2024-09-05 The Bloomsbury Handbook of Diversity Crises and Transformative Leadership in Higher Education explores the intersections of contemporary understandings and practices of leadership within higher education around diversity inclusion and indigeneity With contributions from four continents the handbook brings together diverse perspectives to explore a range of topics including access equity cultural competence decolonisation student activism and indigenous insights Countries covered include Australia Canada Czech Republic India New Zealand Pakistan South Africa and the USA The book forms part of the Bloomsbury Handbooks of Crises and Transformative Leadership in Higher Education collection brought together by Mary Drinkwater

Anchored in Place Bank, Leslie, Cloete, Nico, 2018-11-05 Tensions in South African universities have traditionally centred around equity particularly access and affordability historical legacies such as apartheid and colonialism and the shape and structure of the higher education system What has not received sufficient attention is the contribution of the university to place based development This volume is the first in South Africa to engage seriously with the place based developmental role of universities In the international literature and policy there has been an increasing integration of the university with place based development especially in cities This volume weighs in on the debate by drawing attention to the place based roles and agency of South African universities in their local towns and cities It acknowledges that universities were given specific development roles in regions homelands and towns under apartheid and comments on why sub national place based development has not been a key theme in post apartheid higher education planning Given the developmental crisis in the country universities could be expected to play a more constructive and meaningful role in the development of their own precincts cities and regions But what should that role be Is there evidence that this is already occurring in South Africa despite the lack of a national policy framework What plans and programmes are in place and what is needed to expand the development agency of universities at the local level Who and what might be involved Where should the focus lie and who might benefit most and why Is there a need perhaps to approach the challenges of college towns secondary cities and metropolitan centers differently This book poses some of these questions as it considers the experiences of a number of South African universities including Wits Pretoria Nelson Mandela University and especially Fort Hare as one of its post centenary challenges

Achieving Nelson Mandela University? Sibongile Muthwa, Denver A. Webb, 2024-08-20 South Africa's higher education sector is rooted in the country's divided past

A significant State driven restructuring from around 1997 to 2005 resulted in what is largely the current configuration of public universities. But just over two decades later for a variety of reasons the higher education sector in South Africa appears beset with numerous challenges. Nelson Mandela University is one of the public universities that emerged from the restructuring process. The university is in an ongoing state of evolution of becoming. It developed out of the amalgamation of the University of Port Elizabeth, Port Elizabeth Technikon and incorporation of the Port Elizabeth campus of Vista University as Nelson Mandela Metropolitan University in 2005. In 2017 it was renamed Nelson Mandela University after the world renowned statesman rather than the metropolitan area in which the university is primarily located. The renaming was conceptualised as more than a marketing opportunity to rebrand the university but as an opportunity to reorientate the university to reposition Nelson Mandela University as an engaged and socially embedded university in the service of society striving to be the academic expression of the values and ethos of its iconic namesake. Endeavouring to be something greater and different from the norm imbues its strategy, public statements and practices. The determination to achieve Mandela University serves or is intended to serve as both an organising principle and a lodestar. A cross section of writers from different backgrounds situates Nelson Mandela University within the contemporary historical moment from which it emerged and examines its subsequent evolution. While Nelson Mandela University has performed the usual work expected of any university it has also sought to turn the university outwards to achieve a higher purpose framing itself as a values based university on a journey to become something else. In *Achieving Nelson Mandela University* the university attempts to give an account of itself. The book is an intellectual and scholarly reflection on where the university has come from and where it is seeking to go. ICEL 2018 13th International Conference on e-Learning Professor Eunice Ivala, 2018-07-05 Information Technology in Environmental Engineering Jorge Marx Gómez, Brenda Scholtz, 2016-02-04. This book presents new concepts as well as practical applications and experiences in the field of information technology for environmental engineering. The book has three main focus areas: firstly it shows how information technologies can be employed to support natural resource management and conservation, environmental engineering, scientific simulation and integrated assessment studies. Secondly it demonstrates the application of computing in the everyday practices of environmental engineers, natural scientists, economists and social scientists. And thirdly it demonstrates how the complexity of natural phenomena can be approached using interdisciplinary methods where computer science offers the infrastructure needed for environmental data collection and management, scientific simulations, decision support, documentation and reporting. The book collects selected papers presented at the 7th International Symposium on Environmental Engineering held in Port Elizabeth, South Africa, in July 2015. It discusses recent success stories in eco-informatics, promising ideas and new challenges from the interdisciplinary viewpoints of computer scientists, environmental engineers, economists and social scientists, demonstrating new paradigms for problem solving and decision making. *Foundations of Community Health Nursing* Mr. Rohit Manglik, 2024-05-24.

Introduces key concepts in public and community health nursing Focuses on prevention health promotion and outreach strategies

Practical Applications of Medical Geology Malcolm Siegel, Olle Selinus, Robert Finkelman, 2021-08-01 This edited volume provides a framework for integrating methods and information drawn from geological and medical sciences and provides case studies in medical geology to illustrate the usefulness of this framework for crafting environmental and public health policies related to natural materials The relevance of medical geology research to policy decisions is a topic rarely discussed and this volume attempts to be a unique source for researchers and policy makers in the field of medical geology in addressing this gap in practical medical geology applications The book's four sections establish this framework in detail using risk assessment case studies data analyses and specific medical geology techniques Following an introduction to medical geology in the context of risk assessment and risk management the second section discusses specific methods used in medical geology in the categories of geoscience biomedicine and data sources The third section discusses the medical geology of natural materials energy use and environmental and workplace impacts This section includes specific case studies in medical geology and describes how the methods and data from the previous section are used in a medical geology analysis The fourth section includes a guide to the medical geology literature and provides some examples of medical geology programs in Asia and Africa
