Dimick, 2024-10-08 As climate change alters seasons around the globe literature registers and responds to shifting environmental time A writer and a fisher track the distribution of beach trash in Chennai chronicling disruptions in seasonal winds and currents along the Bay of Bengal An essayist in the northeastern United States observes that maple sap flows earlier now prompting him to reflect on gender and seasons of transition Poets affiliated with small island nations arrive in Paris for the United Nations climate summit revamping the occasional poem to attest to intensifying storm seasons across the Pacific In *Unseasonable* Sarah Dimick links these accounts of shifting seasons across the globe tracing how knowledge of climate change is constructed conveyed and amplified via literature She documents how the unseasonable reverberates through environmentally privileged and environmentally precarious communities In chapters ranging from Henry David Thoreau's journals to Alexis Wright's depiction of Australia's catastrophic bushfires from classical Tamil poetry to repeat photography Dimick illustrates how seasonal rhythms determine what flourishes and what perishes She contends that climate injustice is an increasingly temporal issue unfolding not only along the axes of who and where but also in relation to when Amid misaligned and broken rhythms attending to the shared but disparate experience of the unseasonable can realign or sharpen solidarities within the climate crisis Analyzing the Strategic Role of Neuromarketing and Consumer

Neuroscience Atli, Dincer, 2020-06-19 Marketing research in modern business has developed to include more than just data

analytics Today an emerging interest within scientific marketing researches is the movement away from consumer research toward the use of direct neuroscientific approaches called neuromarketing For companies to be profitable they need to utilize the neuromarketing approach to understand how consumers view products and react to marketing both consciously and unconsciously Analyzing the Strategic Role of Neuromarketing and Consumer Neuroscience is a key reference source that provides relevant theoretical frameworks and the latest empirical research findings in the neuromarketing field While highlighting topics such as advertising technologies consumer behavior and digital marketing this publication explores cognitive practices and the methods of engaging customers on a neurological level This book is ideally designed for marketers advertisers product developers brand managers consumer behavior analysts consumer psychologists managers executives behaviorists business professionals neuroscientists academicians and students Online Collaborative Translation in China and Beyond Chuan Yu,2022-11-30 In this original and innovative work Yu boldly tackles the increasingly influential collaborative translation phenomenon with special reference to China She employs the unique perspective of an ethnographer to explore how citizen translators work together as they select translate edit and polish translations Her area of particular interest is the burgeoning yet notably distinctive world of the Chinese internet where the digital media ecology is with Chinese characteristics Through her longitudinal digital ethnographic fieldwork in Yeeyan Cenci and other online translation platforms where the source materials usually come from outside China Yu draws out lessons for the various actors in the collaborative translation space focusing on their communities working practices and identities for nothing is quite as it seems She also theorises relationships between the actors their work and their places of work offering us a rich and insightful perspective into the often hidden world of collaborative translation in China The contribution of Yu s work also lies in her effort in looking beyond China providing us with a landscape of collaborative translation in practice in training and in theory across geographic contexts This volume will be of particular interest to scholars and postgraduate students in translation studies and digital media **Structural Racism** Stephen Menendian,2025-06-30 This book explains how racial inequality in the United States is produced and perpetuated and what should be done about it It develops the elusive concept of structural racism presenting a precise definition that is clear and comprehensible and illustrates how it operates methodically and rigorously Many other books are long on problems and short on solutions whereas this book develops the key principles that must ground a structural reform agenda and then presents a broad ranging set of interventions organized around ten themes that will reduce racial disparities while expanding opportunity for all Unlike most books on race which focus on a particular issue or sector this book is comprehensive in its scope encompassing the vital systems that shape racial inequality in contemporary American society from education and public schools to income and wealth disparities to housing and health care to policing and the criminal justice system As such this book is the ideal text for readers seeking to learn more about structural racial inequality in society how it came to be that way and what we should do about it while deepening

our understanding and challenging many misguided or simplistic prevailing notions In a time of backlash to racial justice and growing doubts about racial equity initiatives this book is a timely and necessary entry A must read for advocates students policymakers and researchers alike The Public Mind and the Politics of Postmillennial U.S.-American Writing Jolene Mathieson, Marius Henderson, Julia Lange, 2022-08-22 In the last twenty years how has U S American writing and the reading public responded to the complexity of an American culture resolutely situated in a larger highly politicized globalized world undergoing radical change The 20th century modes of realism and postmodernism have been succeeded by writerly practices that are that are invested in the idea of embodied authenticity and that are relatable to neorealism whether it be via outright affirmation or critical experimentation and appropriation The individual case studies mark the ways in which postmillennial U S American writing is marked by an ongoing awareness toward complexity and the entanglement of writers and the reading public with pressing political concerns and at times oppressive social and economic discursive and structural formations These contributions further attest to how narrative and structural complexity grammatical and lexical sophistication and social nuance endure as the main literary modes of confronting 21st century political life This volume is thus of interest for both the study of U S American political culture and U S American literature Learning That Sticks Bryan Goodwin, Tonia Gibson, Kristin Rouleau, 2020-06-05 In far too many classrooms the emphasis is on instructional strategies that teachers employ rather than on what students should be doing or thinking about as part of their learning What s more students minds are something of a mysterious black box for most teachers so when learning breaks down they re not sure what went wrong or what to do differently to help students learn It doesn t have to be this way Learning That Sticks helps you look inside that black box Bryan Goodwin and his coauthors unpack the cognitive science underlying research supported learning strategies so you can sequence them into experiences that challenge inspire and engage your students As a result you ll learn to teach with more intentionality understanding not just what to do but also when and why to do it By way of an easy to use six phase model of learning this book Analyzes how the brain reacts to stores and retrieves new information Helps you zoom out to understand the process of learning from beginning to end Helps you zoom in to see what s going on in students minds during each phase Learning may be complicated but learning about learning doesn t have to be And to that end Learning That Sticks helps shine a light into all the black boxes in your classroom and make your practice the most powerful it can be This product is a copublication of ASCD and McREL **Monkey Two** Paul Adams, 2017-10-05 In 1925 the State of Tennessee enacted a law that prohibited the teaching of evolution in public schools specifically that man came from apes The law was immediately challenged by the ACLU and pitted two famous lawyers Clarence Darrow and William Jennings Bryan a religious Fundamentalist and one time presidential candidate in a bruising contest The case became famous known as the Monkey Trial In this fictional trial a high school teacher was fired for introducing religion into his biology class in the form of criticism of Darwinism The trial involves expert witnesses from a variety of fields who defend and attack Darwinism but not merely

from a biology point of view There are deep religion atheism legal political philosophical and cultural issues that are at stake and reflect today's bifurcated society The Supreme Court cases in the past fifty years on the Establishment Clause of the First Amendment are demonstrated as in disarray especially in school religion cases The famous bioatheist Richard Dawkins is called out for his trenchant criticism of Christians and distortion of Darwinism to achieve his ends The lawyers are cut from vastly different cloth an ex Vietnam soldier and an anti war conscientious objector But the scientific and religious experts do most of the talking from the witness stand The present book describes the preparation for and First Week of Trial

Impressionable Biologies Maurizio Meloni, 2019-01-10 During the twentieth century genes were considered the controlling force of life processes and the transfer of DNA the definitive explanation for biological heredity Such views shaped the politics of human heredity in the eugenic era controlling heredity meant intervening in the distribution of good and bad genes However since the turn of the twenty first century this centrality of genes has been challenged by a number of postgenomic disciplines The rise of epigenetics in particular signals a shift from notions of biological fixedness to ideas of plasticity and impressionability of biological material This book investigates a long history of the beliefs about the plasticity of human biology starting with ancient medicine and analyses the biopolitical techniques required to govern such permeability It looks at the emergence of the modern body of biomedicine as a necessary displacement or possibly reconfiguration of earlier plastic views Finally it analyses the returning of plasticity to contemporary postgenomic views and argues that postgenomic plasticity is neither a modernistic plasticity of instrumental management of the body nor a postmodernist celebration of potentialities It is instead a plasticity that disrupts clear boundaries between openness and determination individual and community with important implications for notions of risk responsibility and intervention

Labs of Our Own Sig / Sara Giordano, 2025-02-11 From climate change to COVID 19 to reproductive justice there has been deep political polarization around science Labs of Our Own provides a unique entry point into these twenty first century science wars by focusing on

our affective relationships to science The book delves into various sites where scientists teachers artists and activists claim to create more democratic access to science from DIY biology community labs to feminist classrooms to activist science practitioners The reader will find that these claims for and attempts at democratic sciences not only impact what counts as science and who counts as a scientist but reconfigure who is included in the proper public Instead of arguing for a knee jerk defense of science against right wing attacks Labs of Our Own builds the case for a feminist antiracist decolonial queer science tinkering practice that intentionally politically and ethically acts to produce new challenges to the definition and boundaries of the human

The Routledge Handbook of Dehumanization Maria Kronfeldner, 2021-02-25 A striking feature of atrocities as seen in genocides civil wars or violence against certain racial and ethnic groups is the attempt to dehumanize to deny and strip human beings of their humanity Yet the very nature of dehumanization remains relatively poorly understood The Routledge Handbook of Dehumanization is the first comprehensive and multidisciplinary reference source on the subject and an outstanding survey of the key concepts issues and debates within dehumanization studies Organized into four parts the Handbook covers the following topics The history of dehumanization from Greek Antiquity to the 20th century contextualizing the oscillating boundaries dimensions and hierarchies of humanity in the history of the West How dehumanization is contemporarily studied with respect to special contexts as part of social psychology as part of legal studies or literary studies and how it connects to the idea of human rights disability and eugenics the question of animals and the issue of moral standing How to tackle its complex facets with respect to the perpetrator s and the target s perspective metadehumanization and selfdehumanization rehumanization social death status and interdependence as well as the fear we show toward robots that become too human for us Conceptual and epistemological questions on how to distinguish different forms of dehumanization and neighboring phenomena on why dehumanization appears so paradoxical and on its connection to hatred essentialism and perception Essential reading for students and researchers in philosophy history psychology and anthropology this Handbook will also be of interest to those in related disciplines such as politics international relations criminology legal studies literary studies gender studies disability studies or race and ethnic studies as well as readers from social work political activism and public policy

Deep Fakes, Fake News, and Misinformation in Online Teaching and Learning Technologies Blankenship, Rebecca J., 2021-06-25 Choosing the right technologies to match student learning outcomes in today s technology integrated classrooms presents educators and instructional designers with multiple curricula and instructional design challenges including selecting appropriate technologies to match desired student learning outcomes As students continue to have broad access to information from a variety of web based platforms educators and educational professionals are increasingly tasked with ensuring the information used to complete key assignments or tasks is authentic and from a verifiable resource As such the era of deep fakes in images audios videos and digital texts is more prevalent than ever as numerous programs using artificial intelligence AI can significantly alter original content to fundamentally change

the intent of original content Moreover students are being bombarded by a plethora of information that is either intentionally or mistakenly false and must be navigated with care Accordingly educators and educational professionals are now tasked with employing best practices to not only teach basic digital literacy and citizenship skills but also to recognize how technology immersed learning environments interact with deep fakes and misinformation while equipping students with the tools necessary to recognize authentic and altered content Deep Fakes Fake News and Misinformation in Online Teaching and Learning Technologies is a critical reference source that addresses rising concerns of students ability to navigate the multitude of false and altered information and content that is easily accessible through online platforms The chapters go into deeper detail about how deep fakes fake news and mis and dis information have the potential of negatively affecting the fields of teaching and learning and the importance of student access to content related tasks from legitimate vetted resources that accurately reflect the desired information the student means to convey The book seeks to reinforce the importance of digital literacy and digital citizenship among adolescents This book is essential for teaching faculty higher education faculty higher education administrators educational software developers security specialists information specialists media specialists librarians educational researchers and students looking for information on how deep fakes and fake news are being navigated within the context of online teaching and educational technologies *The Incentivised University* Seán Mfundza Muller,2022-01-24 The core thesis of this book is that to understand the implications of incentive structures in modern higher education we require a deeper understanding of associated issues in the philosophy of science Significant public and philanthropic resources are directed towards various forms of research in the hope of addressing key societal problems That view and the associated allocation of resources relies on the assumption that academic research will tend towards finding truth or at least selecting the best approximations of it The present book builds on and extends contributions in philosophy and higher education to argue that this assumption is misplaced with serious implications for modern higher education and its role in informing societal decisions and government policy The book develops a philosophical foundation for the analysis of the connection between higher education incentives scientific progress and societal outcomes That in turn is used to demonstrate how the current approach to incentivising intellectual and scientific progress is likely not only to fail but in fact to cause harm on the very dimensions it purports to improve The arguments presented are illustrated with examples from medicine and academic economics making the book one of the first to examine issues of scientific progress and social consequences across the human and social sciences In doing so it develops a novel critique of modern economics that in turn provides a more philosophically substantive foundation for popular critiques of economics than has existed to date
