At the same time the center of this community is consumed by the AIDS crisis and the very structure of town life is being rewired out of necessity

Following the success of his acclaimed memoir *The Narrow Door* Lisicky fearlessly explores the body queerness love illness community and belonging in this masterful ingenious new book

**A Natural History of the Common Law** S. F. C. Milsom, 2003-12-03  
How does law come to be stated as substantive rules and then how does it change  
In this collection of discussions from the James S Carpentier Lectures in legal history and criticism one of Britain s most acclaimed legal historians S F C Milsom focuses on the development of English common law the intellectually coherent system of substantive rules that courts bring to bear on the particular facts of individual cases from which American law was to grow  
Milsom discusses the differences between the development of land law and that of other kinds of law and in the latter case how procedural changes allowed substantive rules first to be stated and then to be circumvented  
He examines the invisibility of early legal change and how adjustment to conditions was hidden behind such things as the changing meaning of words  
Milsom points out that legal history may be more prone than other kinds of history to serious anachronism  
Nobody ever states his assumptions and a legal writer addressing his contemporaries never provided a glossary to warn future historians against attributing their own meanings to his words and therefore their own assumptions to his world  
Formal continuity has enabled nineteenth century assumptions to be carried back in some respects as far back as the twelfth century  
This book brings together Milsom s efforts to understand the uncomfortable changes that lie beneath that comforting formal surface  
Those changes were too large to have been

intended by anyone at the time and too slow to be perceived by historians working within the short periods now imposed by historical convention The law was made not by great men making great decisions but by man sized men unconcerned with the future and thinking only about their own immediate everyday difficulties King Henry II for example did not intend the changes attributed to him in either land law or criminal law the draftsman of De Donis did not mean to create the entail nobody ever dreamed up a fiction with intent to change the law

**Off-label Prescribing** David Cavalla, 2014-12-19 Today's medicines are regulated for their efficacy and safety and once approved they can be marketed for certain uses as justified by the data Regulatory bodies in developed countries are constituted by legal statute and operate as parts of government ostensibly in the interests of the people as patients But once approved medicines can be used for any purpose the prescriber thinks fit and appropriate for the patient One in five prescriptions is therefore written outside regulatory purview Off label Prescribing looks into the corners of our medicated lives where drug regulation runs up against medical practice and concerns the use of a drug that has been approved for one use in medical parlance indication being used for a different indication alternatively being used on a

different set of patients from the ones it is approved for or at a different dose Usually the patient is unaware of what is going on having not been informed by their doctor of this aspect of his or her prescribing choice The book examines how and why this occurs what the various medical professions have to say about it and how pharmaceutical companies benefit by moving into this poorly regulated area Off label Prescribing pulls these complex issues together in one volume to highlight current practice its advantages and weaknesses and how the author suggests practice should evolve in the future It will therefore be of interest to all those who prescribe and receive medicines combined with a greater objective to provide more transparency and discussion for professionals

systems of knowledge and a call for critical collaborations These collaborations seek to forge connections without perceived identity linking concepts and communities without violating the differences that constitute them seeking epistemic kinships while maintaining a willingness to not know In this way they form a critical conversation between seemingly distinct areas and demonstrate fundamental allegiances between diasporic and indigenous scholarship transnational and local knowledges legal and eco critical methodologies Links are forged between Indigenous knowledge and ecological and social justice creative critical reading and ambidextrous epistemologies unmaking the nation through translocalism and unsettling histories of colonial complicity through a poetics of relation Together these essays reveal how the critical methodologies brought to bear on literary studies can both challenge and exceed disciplinary structures presenting new forms of strategic transdisciplinarity that expand the possibilities of Canadian literary studies while also emphasizing humility complicity and the limits of knowledge
