Autorzy przedstawiają analizę wyników pośmiertnego badania obrazowego TK w przypadku utonięcia młodej osoby w rzece. Obraz radiologiczny porównywany jest do wyników konwencjonalnej sądowo-lekarskiej sekcji zwłok. Analizę ilustrują rekonstrukcje 2D i przestrzenne na podstawie plików DICOM z akwizycji TK.

The authors present an analysis of postmortem CT examination in a case of drowning in fresh water of a young male. Both the results of conventional forensic autopsy and radiologic examination have been compared. The analysis is illustrated by two-dimensional and three-dimensional reconstructions based on the DICOM files obtained during postmortem CT examination.

WSTĘP

Diagnostyka przyczyny zgonu z powodu utonięcia nie stanowi dla medyków sądowych

łatwego zadania [1, 2, 3]. W konwencjonalnym („klasycznym”) badaniu pośmiertnym wniosek taki przyjmuje się bowiem przede wszystkim poprzez wykluczenie innej przyczyny zgonu, a ani obraz makroskopowy, ani mikroskopowy płuc nie przesądza rozpoznania, chociaż w tym zakresie ciągle prowadzone są badania [4, 5, 6, 7, 8, 9, 10]. Przedstawiane są także rozmaite pośmiertne badania biochemiczne, których wyniki mają dowodzić zgonu wskutek utonięcia [11, 12, 13, 14, 15, 16, 17, 18, 19]. W piśmiennictwie postulowane jest poszukiwanie obecności mikroorganizmów [20, 21, 22, 23, 24, 25, 26]. Wprowadzone z początkiem bieżącego stulecia do praktyki sądowo-lekarskiej pośmiertne badania obrazowe TK również dają szansę wykazania zmian, które można byłoby odnieść do mechanizmu zgonu w wyniku utonięcia.

MATERIAŁ I METODY

Postmortem Report For Drowning:

Case Studies in Drowning Forensics Kevin Gannon, D. Lee Gilbertson, 2018-12-07 When a corpse is found in a body of water authorities generally presume that the manner of death was either an accident or a suicide They do not treat the recovery site as a potential crime scene or homicide so many cases remain unsolved *Case Studies in Drowning Forensics* investigates the cases of 13 bodies recovered from water in similar circumstances *Izmirli, My Last Love* Firat Sunel, 2025-01-20 The last love is like the last hanging threads of hope at times dearer than life Can it ever be forgotten Eylul a young lawyer within the turn of a night moved to Istanbul from Germany after her mother's sudden drowning Her beautiful mother left behind a prestigious law firm and a daunting legacy As life pulls Eylul in tethers the demands of the law firm highlight her unpreparedness but she can only obsess over her mother's unconvincing drowning thanks to an old letter which seems to belong to her mother What begins is a complex odyssey as she chases after an Izmirli with one thought did Izmirli cause her mother's death As Eylul delves deeper into the mysteries of her mother's past and her love life it becomes unclear what is Izmirli Is her mother's past and Eylul's present one of the same has memory and reality merged into one Each discovery reveals a bigger and darker hole in a seemingly endless tunnel Izmirli is a compelling psychological thriller and romance and a gripping narrative of personal discovery but also an exploration of the complexities of human relationships Highly gripping psychological thriller An engaging read with unpredictable twists and turns An intense drama transporting away from reality Perfect for reads who enjoy books like *The Gone Girl* and *The Silent Patient* Perfect read for the weekend nights and a reading group *Forensic and Legal Medicine* Jason Payne-James, Roger Byard, 2023-12-20 A comprehensive and accessible resource covering all aspects of forensic and legal medicine The text provides a foundation for those working in both the clinical and forensic aspects of care and will also be an asset to those involved in the police or judicial systems Including clear guidelines for practical applications and further enhanced by its many illustrations and case examples this text is a valuable resource in an increasingly complex field The authoritative work is written by those who have extensive experience for a wide audience including but not limited to forensic pathologists general pathologists pediatric pathologists forensic physicians forensic scientists coroners emergency department physicians judges and legal practitioners Chapter 62 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license **Report on Decompression Illness, Diving Fatalities and Project Dive Exploration**, 1999 **Relating Suicide** Anne Whitehead, 2023-01-12 Writing against the prevailing narrativization of suicide in terms of why it happened Whitehead turns instead to the questions of when how and where calling attention to suicide's materiality as well as its materialization By turns provocative and deeply affecting this book brings suicide into conversation with the critical medical humanities extending beyond individual pathology and the medical institution to think about subjective and social perspectives and to open up the various sites scenes and interactions

with which suicide is associated Suicide is related forward from the point of death rather than taking a retrospective view Combining critical and textual analysis with personal reflection based on her own experience of her sister s suicide Whitehead examines the days months and years following a death by suicide This pivoting of attention to what happens in the wake of suicide brings to light the often surprising ways in which suicide is woven into the everyday places that we inhabit and in which it is related to all of us albeit with varying degrees of proximity and kinship

Forensic Imaging of Trauma
Silke Grabherr, Sarah Heinze, Tony Fracasso, 2024-05-15 Forensic Imaging is increasingly gaining importance in post mortem and medico legal investigations particularly in cases of trauma Indeed the digitization of a body serving as evidence in court has become standard practice in many countries To analyze forensic images effectively one must possess expertise not only in radiological interpretation but also in understanding post mortem changes as well as the morphology of lesions and their medico legal implications Neither of the two disciplines involved Radiology and Forensic Medicine can fully provide the necessary knowledge individually Hence Forensic Radiology is now recognized as a discipline that integrates both specializations This book aims to bridge the gap between these two fields by elucidating the morphology of specific trauma related lesions It seeks to assist in identifying these lesions in forensic images and interpreting them accurately from a medico legal perspective The introductory chapter clarifies the distinctions between radiological interpretation and medico legal imaging interpretation It subsequently presents various techniques used in Forensic Imaging outlining their respective advantages and limitations Furthermore this book is the first to comprehensively cover various types of trauma encountered in forensic medicine including blunt trauma sharp trauma ballistic trauma thermal trauma and explosions A separate chapter is dedicated to each of them Additionally it addresses specific commonly observed cases such as traffic accidents asphyxia and child abuse in dedicated chapters Each chapter provides a concise summary of the essential medico legal background and knowledge crucial for the final interpretation It then outlines the appropriate radiological techniques for investigating the specific trauma and offers practical tips for image acquisition Radiological findings are subsequently listed and illustrated in corresponding figures Finally the book explains the medico legal interpretation of the observed findings and provides guidance on how to report them This book represents a pioneering effort to amalgamate the knowledge of forensic medicine and radiology regarding the interpretation of various trauma cases It serves as a valuable handbook for every practitioner in this field offering practical insights from image acquisition to the ultimate interpretation of collected data

Armed Forces Special Powers Act Dr. U C Jha,2015-03-01 The Armed Forces Special Powers Act AFSPA has become one of the most controversial laws both in India and the world A few NGOs and human rights activists have described it as draconian alleging that it gives the armed forces unrestricted power to arrest without warrant destroy property and shoot to kill besides providing them with complete immunity The loud and continuous clamour against the Act has drawn the attention of various international organizations The UN Special Rapporteur on Extrajudicial Summary or Arbitrary Executions Christof Heyns has recently called for the repeal of the law stating AFSPA allows the state to override rights Such a law has no role in a democracy and should be scrapped On the other hand the armed forces hold that the AFSPA is necessary for tackling the growing menace of militancy and protecting their men from the unnecessary harassment caused by litigation General V K Singh the former chief of army staff and now a cabinet minister has emphasized that the AFSPA is a functional requirement of the armed forces This is the first book in India not only to attempt a complete analysis of the various provisions of the AFSPA but also to provide an insight into the legislative efforts of other democracies to meet the challenges of growing terrorism It delves into cases of human rights violations in which members of the armed forces have been implicated and at the same time argues that it is equally important to safeguard the human rights of the members of the armed forces In order to help find an amicable solution the author makes a few recommendations for the consideration of the government and armed forces

Handbook of Autopsy Practice Jurgen Ludwig,2002-07-18 The second edition of Handbook of Autopsy Practice appeared in 1979 under the title Current Methods of Autopsy Practice W B Saunders Company that edition was out of print in the early 1980s Now over 20 years later it appeared timely to thoroughly update the material in a third edition by adding what we have learned in the meantime and eliminating text that has become obsolete There is an acute need for a complete and readily accessible resource for autopsy work because few pathologists still specialize in autopsy practice and as a consequence expertise in autopsy technology and autopsy pathology has declined Our colleagues in the forensic field have remained the only large group of autopsy practitioners For most other pathologists the

economic situation time constraints and the steadily decreasing autopsy rates have made a career in autopsy pathology unattractive This state of affairs is perpetuated by a lack of interest among many of our young colleagues partly because the teaching of autopsy pathology and autopsy techniques during most residencies is insufficient Numerous articles have been moaned this situation but the trend I fear is irreversible Still autopsies will be requested particularly in complex and difficult situations where the questions remaining after the death of the patient might challenge even experienced autopsy pathologists Under these circumstances this Handbook of Autopsy Practice should meet a particular need by providing the prosecutor with a source of information when it is most required in the autopsy room **The Coroner's Autopsy** Bernard Knight, 1983
