Theoretical Approaches to Multi-Cultural Positive Psychological Interventions Llewellyn Ellardus Van Zyl, Sebastiaan Rothmann Sr., 2019-06-11 This volume provides theoretical perspectives on and approaches to the development or enhancement of positive psychological capacities within various multi cultural professional and organizational contexts. Specifically it presents theoretical frameworks for the identification, development and optimization of positive psychological capacities through a contemporary multi cultural and multi disciplinary lens. In recent years the applicability of positive psychological intervention (PPI) techniques has transposed the boundaries of clinical practice into a wide array of complementary domains such as law, education, business and even design sciences such as architecture. These interventions target the enhancement of positive psychological capacities e.g. strength, identification and use, high performance, learning, appreciative design, job crafting in order to not only improve individual functioning, well being and the treatment of various forms of psychopathology but also to enhance team functioning, performance, organizational growth and community development. Despite its importance, very little research has been done on the design of PPIs applicable to multi cultural contexts. The contributions to this volume provide insights into this hitherto neglected area of research.
