StarBriefs 2001 ,2012-12-06 This compilation probably looks like one of the craziest things a human being could spend his or her time on Yet nobody would wonder at someone taking a short walk every day after twenty five years that person would have covered a surprisingly long distance This is exactly the story behind this list which appeared first as a few pages within the directory StarGuides or whatever name it had at that time and as a distinct sister publication since 1990 The idea behind this dictionary is to offer astronomers and related space scientists practical assistance in decoding the numerous abbreviations acronyms contractions and symbols which they might encounter in all aspects of the vast range of their professional activities including traveling Perhaps it is a bit paradoxical but if scientists quickly grasp the meaning of an acronym solely in their own specific discipline they will probably encounter more difficulties when dealing with adjacent fields It is for this purpose that this dictionary might be most often used Scientists might also refer to this compilation in order to avoid identifying a project by an acronym which already has too many meanings or confused definitions

Semistructured Database Design Tok Wang Ling,Gillian Dobbie,2006-03-30 Semistructured Database Design provides an essential reference for anyone interested in the effective management of semistructured data Since many new and advanced web applications consume a huge amount of such data there is a growing need to properly design efficient databases This volume responds to that need by describing a semantically rich data model for semistructured data called Object Relationship Attribute model for Semistructured data ORA SS Focusing on this new model the book discusses problems and presents solutions for a number of topics including schema extraction the design of non redundant storage organizations for semistructured data and physical semistructured database design among others Semistructured Database Design presents researchers and professionals with the most complete and up to date research in this fast growing field
