*The Heredity of Behavior Disorders in Adults and Children* D.L. Pauls, S.M. Singer, S.G. Vandenberg, 2012-12-06 Current trends in morbidity suggest that by the beginning of the twenty first century psychiatric illness may become the most pressing problem in public health in many of the advanced countries As ably demonstrated by Vandenberg Singer and Pauls the principal identifiable etiology of the major psychiatric disorders is heredity if progress is to be made in prevention and treatment of these disorders it may have to come from improved understanding of their inheritance A relentless increase has been observed in the frequency of mood disorders primarily major depression but also manic depressive illness appearing earlier and more frequently in each age cohort born since approximately 1940 Because major depression is a recurrent disorder whose episodes increase in frequency with age the number of observed depressions can be expected to increase dramatically as these people reach middle and old age The rate of suicide has also increased enormously according to birth cohort Starting with people born around 1935 the rate of suicide between 15 and 19 years of age has increased more than 10 times from the earliest to the most recent birth cohorts What is not clear is if there will be a compensatory reduction in suicide rate as this cohort ages because people likely to commit suicide will have done so earlier or if this presages a general increase in suicide comparable to the increase in mood disorders and perhaps a function of them *Managing Anxiety at Work* 50minutes, 2017-11-23 Ready to take your career to the next level Find out everything you need to know about dealing with work related anxiety and panic attacks with this practical guide More and more workers are feeling stressed and anxious at work and in its most severe form anxiety can be debilitating and severely diminish your professional effectiveness Fortunately identifying and tackling the root causes of this widespread problem including unrealistic objectives and the fear of not being good enough will allow you to remain calm and happy at work no matter how much pressure you are under In 50 minutes you will be able to Identify the causes symptoms and effects of anxiety and panic attacks Find out why you feel anxious worried or stressed at work Select the best course of treatment for you and take action to prevent relapses ABOUT 50MINUTES COM COACHING The Coaching series from the 50Minutes collection is aimed at all those who at any stage in their careers are looking to acquire personal or professional skills adapt to new situations or simply re evaluate their work life balance The concise and effective style of our guides enables you to gain an in depth understanding of a broad range of concepts combining theory constructive examples and practical exercises to enhance your learning **Current Catalog** National Library of Medicine (U.S.), 1982 First multi year cumulation covers six years 1965 70 National Library of Medicine Current Catalog National Library of Medicine (U.S.), 1971 First multi year cumulation covers six years 1965 70
