According to the Safety Rules of the National Board of Fire Underwriters The ow of current is also said to have a certain
direction that is it is noticed that many of its effects are reversed when the terminals of the battery are reversed Referring to
Fig L which shows a battery of three cells the current ows from the copper element at bottom of jar 1 along the wire to the
zinc element at top of jar 2 thence through the liquid to the copper element at bottom of jar 2 and from there to the zinc at
top of jar 3 etc and finally through the wire a back to the starting point Within the battery the current ows from the zinc to
the copper and the decomposition of the zinc gen crates the current In the wire outside of the battery the cur Rent ows from
the copper to the zinc as indicated by arrows The combination of battery and wire is known as an electric circuit The current
will ow in this circuit only while it is complete that is while each wire connects to its proper place as shown If any wire is
disconnected the current ow will cease Such a circuit is said to be open but when all connections are properly made it is said
