

The background of the entire image is a dynamic space battle. In the upper left, a large, dark, angular carrier ship is shown firing a powerful, glowing orange energy beam towards the right. In the lower half, a massive, elongated dreadnought ship is seen from a low angle, appearing to move towards the viewer. It has a complex, multi-segmented hull with various details like gun ports and sensor arrays. The background is a deep blue space with a bright blue nebula or energy field on the right side. Several smaller, distant ships are visible in the mid-ground, some appearing to be in combat or fleeing. The overall tone is epic and action-packed.

Planet Strike Extinction Wars:

Planet Strike Vaughn Heppner, 2014-03-08 Earth's last Assault Troopers storm an alien ship the size of a planet. After escaping from the Jelk Corporation and hijacking a battlejumper, Creed thought he was free of the extraterrestrials and their war. Now the Lokhars want to hire him, offering advanced technology to clean the radioactive Earth and starships to defend the Solar System. The mission: After untold centuries, an ancient planet-sized vessel has gone online, opening a gateway to a collapsing universe. Anti-life aliens are coming through. Before it's too late, the assault troopers have to storm the ship and seal the portal. Creed will do anything to save the last remnants of humanity, but this will be a commando raid like no other against an enemy that shouldn't exist. Creed will need all his cunning and determination if he hopes to bring his people back alive.

International Seminar On Nuclear War And Planetary Emergencies - 32nd Session: The 32nd Session Of International Seminars And International Collaboration Richard C Ragaini, 2005-06-20 This volume contains the proceedings of the 32nd International Seminar on Nuclear War and Planetary Emergencies, which was attended by global leaders in their scientific fields, advisors to presidents, defence secretaries, and high-level diplomats. Readers are invited to participate in the fascinating debate on the wide range of subjects covered, including migration, global warming, pollution, the cultural planetary emergency, AIDS, and infectious diseases, water conflicts, and energy. The proceedings have been selected for coverage in *Index to Scientific Technical Proceedings*, *ISTP ISI Proceedings*, *Index to Scientific Technical Proceedings*, *ISTP CDROM version*, *ISI Proceedings*, *Index to Social Sciences Humanities Proceedings*, *ISSHP ISI Proceedings*, *Index to Social Sciences Humanities Proceedings*, *ISSHP CDROM version*, *ISI Proceedings*, *CC Proceedings*, *Engineering Physical Sciences CC Proceedings*, *Biomedical Biological Agricultural Sciences*. *War and Algorithm* Max Liljefors, Gregor Noll, Daniel Steuer, 2019-10-11 New military technologies are animated by fantasies of perfect knowledge, lawfulness, and vision that contrast sharply with the very real limits of human understanding, law, and vision. Thus, various kinds of violent acts are proliferating while their precise nature remains unclear. Especially, man-machine ensembles guided by algorithms are operating in ways that challenge conceptual understanding. *War and Algorithm* looks at the increasing power of algorithms in these emerging forms of warfare from the perspectives of critical theory, philosophy, legal studies, and visual studies. The contributions in this volume grapple with the challenges posed by algorithmic warfare and trace the roots of new forms of war in the technological practices and forms of representation of the digital age. Together, these contributions provide a first step toward understanding and resisting our emerging world of war. [International Seminar On Nuclear War And Planetary Emergencies - 43rd Session](#) Richard C Ragaini, 2011-06-08 Proceedings of a seminar focusing on planetary emergencies followed in a multidisciplinary approach since 1980 by permanent monitoring panels. *Planetary Defense* Nikola Schmidt, 2018-12-26 Planetary defense from near-Earth objects such as asteroids is a far more nuanced and challenging topic than it might seem. Each day, technology is making it easier to detect asteroid impact threats in advance, but

at present there is still no easy way to design and implement any form of global defense This book examines how various asteroid deflection methods can change global political affairs The authors believe that the final policy for potential Earth impacts should be based on practical engineering solutions and innovative architectural structures while at the same time reflecting the most recent political science contributions in ethical security studies and security cosmopolitanism Their focus is not limited to effective engineering solutions but rather extends to how such proposals resonate in possible political structures of the future Planetary defense cannot be achieved with technology alone the chapters in this volume highlight the issues that arise when space science and technology intersect with political science This complex interdisciplinary project not only demands global participation and collaboration but also proposes the way we can achieve it The authors explore various concepts of governance and their far reaching implications for planetary defense and vice versa how scientific progress in Solar System observations and asteroid collision engineering influence political science and put pressure on the international legal framework The text is intentionally written for a diverse scholarly and diplomatic audience in a style accessible to non specialists and practitioners and can be read by those across diverse disciplinary backgrounds

There Will be Dragons, Second Edition John Ringo, 2013-05-15 Now with all new content by John Ringo Paradise Lost In the future there is no want no war no disease nor ill timed death The world is a paradise and then in a moment it ends The council that controls the Net falls out and goes to war Everywhere people who have never known a moment of want or pain are left wondering how to survive But scattered across the face of the earth are communities which have returned to the natural life of soil and small farm In the village of Raven s Mill Edmund Talbot master smith and unassuming historian finds that all the problems of the world are falling in his lap Refugees are flooding in bandits are roaming the woods and his former lover and his only daughter struggle through the Fallen landscape Enemies new and old gather like jackals around a wounded lion But what the jackals do not know is that while old he may be this lion is far from death And hidden in the past is a mystery that has waited until this time to be revealed You cross Edmund Talbot at your peril for a smith is not all he once was At the publisher s request this title is sold without DRM Digital Rights Management Praise for the Science Fiction of John Ringo MARVELOUS David Weber Explosive Fans of strong military SF will appreciate Ringo s lively narrative and flavorful characters One of the best new practitioners of military SF Publishers Weekly since his imagination clearly influenced by Kipling and rock and roll is fertile and his storytelling skill sound When the Devil Dances is irresistible Booklist fast paced military sf peopled with three dimensional characters and spiced with personal drama as well as tactical finesse Library Journal If Tom Clancy were writing SF it would read much like John Ringo good reading with solid characterizations a rare combination Philadelphia Weekly Press Ringo provides a textbook example of how a novel in the military SF subgenre should be written Crackerjack storytelling Starlog

The Routledge Companion to Politics and Literature in English Matthew Stratton, 2023-05-31 The Routledge Companion to Politics and Literature in English provides an interdisciplinary overview of the vibrant

connections between literature politics and the political Featuring contributions from 44 scholars across a variety of disciplines the collection is divided into five parts Connecting Literature and Politics Constituting the Polis Periods and Histories Media Genre and Techne and Spaces Organized around familiar concepts such as humans animals workers empires nations and states rather than theoretical schools it will help readers to understand the ways in which literature affects our understanding of who is capable of political action who has been included in and excluded from politics and how different spaces are imagined to be political It also offers a series of engagements with key moments in literary and political history from 1066 to the present in order to assess and reassess the utility of conventional modes of periodization The book extends current discussions in the area looking at cutting edge developments in the discipline of literary studies which will appeal to academics and researchers seeking to orient their own interventions within broader contexts

Six Minutes to Winter Mark Lynas, 2025-05-08 Terrifying and timely this is a book everyone should read and heed George Monbiot Urgent gripping and sobering Six Minutes to Winter is a hair raising wake up call David Wallace Wells Powerful and insightful Although many have forgotten about nuclear weapons we shouldn't Charles Oppenheimer The world is currently closer to superpower conflict than at any time since the 1962 Cuban Missile Crisis World War III is a real possibility and with 12 000 warheads in the arsenals of more than half a dozen countries we are standing on a nuclear knife edge Despite receiving very little attention nuclear war is a far greater threat to humanity's immediate survival than climate change While climate heating threatens humanity over many decades nuclear war could destroy civilisation in just a few hours A major missile exchange would mean months of near total darkness followed by a decade long global nuclear winter that would destroy most life on Earth Virtually everyone would starve in the resulting worldwide famine and there would be no reliable refuge We are sleepwalking to Armageddon There are no mass marches no COPs no nuclear Greta But the climate experience teaches us that ignoring a problem is no solution and that a worldwide mobilisation can work Six Minutes to Winter presents an unflinching view of the nuclear nightmare but also describes how weapons can be taken off hair trigger alert and ultimately abolished altogether If human civilisation is to survive long term we have no alternative

Saberhagen Cordwainer Smith Allen Steele William Tenn Walter Jon Williams Michael Z Williamson Gene Wolfe The Palgrave Handbook of Global Politics in the 22nd Century Laura Horn, Ayşem Mert, Franziska Müller, 2023-01-01 This handbook offers a unique approach to the question How do scholars write the future of global politics Written in futuristic style around the 200 year anniversary of the birth of International Relations IR as an academic discipline the contributions engage in world building and imagine different futures of IR Set in a multiverse 23 chapters draw on a range of possible themes and imaginaries for instance post pandemic conditions the Anthropocene and not least academic practices and the role of researchers A concluding chapter anchors these explorations in contemporary discussions The book mirrors the format and style of existing handbooks combining outlines and discussions of theories structures processes and core issues in IR with an academic science fiction account of how these might play out over the course of the next century In doing so the book challenges IR and provides alternative imaginaries rather than predicting future conditions for all humanity The book invites readers to reflect on how thinking about the future has become an increasingly radical but more than ever necessary act Human Extinction Émile P. Torres, 2023-06-15 This volume traces the origins and evolution of the idea of human extinction from the ancient Presocratics through contemporary work on existential risks Many leading intellectuals agree that the risk of human extinction this century may be higher than at any point in our 300 000 year history as a species This book provides insight on the key questions that inform this discussion including when humans began to worry about their own extinction and how the debate has changed over time It establishes a new theoretical foundation for thinking about the ethics of our extinction arguing that extinction would be very bad under most circumstances although the outcome might be on balance good Throughout the book graphs tables and images further illustrate how human choices and attitudes about extinction have evolved in Western history In its thorough examination of humanity's past this book also provides a starting point for understanding our future Although accessible enough to be read by undergraduates Human Extinction contains new and thought provoking research that will benefit even established academic philosophers and historians
