Film, Art, and the Third Culture Murray Smith, 2017-03-24 In the mid 1950s C P Snow began his campaign against the two cultures the debilitating divide as he saw it between traditional literary intellectual culture and the culture of the sciences urging in its place a third

culture which would draw upon and integrate the resources of disciplines spanning the natural and social sciences the arts and the humanities Murray Smith argues that with the ever increasing influence of evolutionary theory and neuroscience and the pervasive presence of digital technologies Snow's challenge is more relevant than ever Working out how the scientific and everyday images of the world hang together is no simple matter In *Film Art and the Third Culture* Smith explores this question in relation to the art technology and science of film in particular and to the world of the arts and aesthetic activity more generally In the first part of his book Smith explores the general strategies and principles necessary to build a third cultural or naturalized approach to film and art one that roots itself in an appreciation of scientific knowledge and method Smith then goes on to focus on the role of emotion in film and the other arts as an extended experiment in the third cultural integration of ideas on emotion spanning the arts humanities and sciences While acknowledging that not all of the questions we ask are scientific in nature Smith contends that we cannot disregard the insights wrought by taking a naturalized approach to the aesthetics of film and the other arts

Dao Companion to the Philosophy of Xunzi Eric L.

Hutton,2016-11-09 This volume presents a comprehensive analysis of the Confucian thinker Xunzi and his work which shares the same name It features a variety of disciplinary perspectives and offers divergent interpretations The disagreements reveal that as with any other classic the Xunzi provides fertile ground for readers It is a source from which they have drawn and will continue to draw different lessons In more than 15 essays the contributors examine Xunzi's views on topics such as human nature ritual music ethics and politics They also look at his relations with other thinkers in early China and consider his influence in East Asian intellectual history A number of important Chinese scholars in the Song dynasty 960-1279 CE sought to censor the Xunzi They thought that it offered a heretical and impure version of Confucianism As a result they directed study away from the Xunzi This has diminished the popularity of the work However the essays presented here help to change this situation They open the text's riches to Western students and scholars The book also highlights the substantial impact the Xunzi has had on thinkers throughout history even on those who were critical of it Overall readers will gain new insights and a deeper understanding of this important but often neglected thinker

Food Wars Tim Lang,Michael

Heasman,2015-10-16 In the years since publication of the first edition of *Food Wars* much has happened in the world of food policy This new edition brings these developments fully up to date within the original analytical framework of competing paradigms or worldviews shaping the direction and decision making within food politics and policy The key theme of the importance of integrating human and environmental health has become even more pressing In the first edition the authors set out and brought together the different strands of emerging agendas and competing narratives The second edition retains the same core structure and includes updated examples case studies and the new issues which show how these conflicting tendencies have played out in practice over recent years and what this tells us about the way the global food system is heading Examples of key issues given increased attention include nutrition including the global rise in obesity as well as

chronic conditions hunger and under nutrition the environment particularly the challenges of climate change biodiversity loss water stress and food security food industry concentration and market power volatility and uncertainty over food prices and policy responses tensions over food democracy and citizenship social and cultural aspects impacting food and nutrition policies

Legal Education in the Global Context Christopher Gane, Robin Hui Huang, 2017-05-15 This book discusses the opportunities and challenges facing legal education in the era of globalization It identifies the knowledge and skills that law students will require in order to prepare for the practice of tomorrow and explores pedagogical shifts legal education needs to make inside and outside of the classroom With contributions from leading experts on legal education from various jurisdictions across the globe the work combines theoretical depth with practical insights Seeking to understand the changing landscape of legal education in the era of globalization the contributions find that law schools can and must adopt educational strategies that at least present students with different understandings of what studying and practicing law is meant to be about They find that law schools need to offer their students choices a vision of practice that is not driven entirely by the demands of the marketplace or the needs of major international law firms Bridging the gap between theory and practice this book makes a significant contribution to the impact of globalization on legal education and how students and law schools need to adapt for the future It will be of great interest to academics and students of comparative legal studies and legal education as well as policy makers and practitioners

The Technocratic Antarctic Jessica O'Reilly, 2017-01-17 The Technocratic Antarctic is an ethnographic account of the scientists and policymakers who work on Antarctica In a place with no indigenous people Antarctic scientists and policymakers use expertise as their primary model of governance Scientific research and policymaking are practices that inform each other and the Antarctic environment with its striking beauty dramatic human and animal lives and specter of global climate change not only informs science and policy but also lends Antarctic environmentalism a particularly technocratic patina Jessica O'Reilly conducted most of her research for this book in New Zealand home of the Antarctic Gateway city of Christchurch and on an expedition to Windless Bight Antarctica with the New

Zealand Antarctic Program O Reilly also follows the journeys Antarctic scientists and policymakers take to temporarily Antarctic places such as science conferences policy workshops and the international Antarctic Treaty meetings in Scotland Australia and India Competing claims of nationalism scientific disciplines field experiences and personal relationships among Antarctic environmental managers disrupt the idea of a utopian epistemic community O Reilly focuses on what emerges in Antarctica among the complicated and hybrid forms of science sociality politics and national membership found there The Technocratic Antarctic unfolds the historical political and moral contexts that shape experiences of and decisions about the Antarctic environment

Havana Syndrome Armin Krishnan, 2025-09-04 Havana Syndrome is most likely caused by unknown types of directed energy weapons either of the acoustic or electromagnetic variety The technology for such weapons has been under development since at least the 1960s The first covert attacks on U S diplomats may go back to that time when the phenomenon was called the Moscow Signal Havana Syndrome A Threat to National Security covers the history of anti personnel directed energy weapons DEW from the Soviet psychotronic weapons that were rumored to exist since the 1970s to the nonlethal weapons developed in the West in the 1980s onward The book examines the publicly known details of Havana Syndrome and provides some analysis of the U S government investigations into Havana Syndrome with respect to what has been declassified The most likely perpetrators are the Russian or Chinese governments as some incidents seem to be related to their strategic interests and as both would have the technology to carry out such sophisticated attacks Havana Syndrome establishes a connection between the Anomalous Health Incidents and what NATO analysts have termed cognitive warfare to speculate about the true purpose of these mysterious attacks

Religion and Humor as Emancipating Provinces of Meaning Michael Barber, 2017-07-26 This book illustrates how non pragmatic finite provinces of meaning emancipate one from pragmatic everyday pressures Barber portrays everyday life originally as including the interplay between intrinsic and imposed relevances the unavoidable pursuit of pragmatic mastery and the resulting tensions non pragmatic provinces can relieve But individuals and groups also inevitably resort to meta level strategies of hyper mastery to protect set ways of satisfying lower level relevances strategies that easily augment individual anxiety and social pathologies After creatively interpreting the Schutzian dialectic between the world of working and non pragmatic provinces Barber describes the experience of reality in the finite provinces of religion and humor Schutz who only mentioned these provinces laid out the six features of the cognitive style that characterize any finite province of meaning This book is the first to follow up on these suggestions and depict two new finite provinces of meaning beyond those in On Multiple Realities While entrance into these provinces reduces everyday life tensions it does not suffice since pragmatic relevances infiltrate the provinces as when one uses humor to belittle competing cultural groups or one deploys religion only as an instrument to ensure crop productivity Instead liberation from anxieties and pathologies is brought to completion when the ego agens the 0 point of all its coordinates discovers its value in relation to the transcendent even if it fails to realize its pragmatic purposes or when one

becomes comical to oneself through the eyes of another different from oneself This book aimed at advanced undergraduate graduate or scholarly audiences presents stimulating analyses of the religious appresentative mindset or of the healing potential of interracial humor Drawing heavily on interdisciplinary resources the book also illustrates the relevance of phenomenological methods and concepts for concrete human experience Barber offers a fresh understanding of pragmatic everyday life original descriptions of the religious and humorous provinces of meaning and a picture of how the overarching intentional stances of meaning provinces along with exposure to another perspective can diminish the pressures everyday life engenders **The Athenaeum**, 1864 Megaproject Risk Analysis and Simulation Prince Boateng, Zhen Chen, Stephen O. Ogunlana, 2017-04-28 Providing new knowledge on risk analysis and simulation for megaprojects this book is essential reading for both academics and practitioners Its focus is on technical descriptions of a newly developed dynamic systems approach to megaproject risk analysis and simulation

Cultures of Prediction in Atmospheric and Climate Science Matthias Heymann, Gabriele Gramelsberger, Martin Mahony, 2017-06-26 In recent decades science has experienced a revolutionary shift The development and extensive application of computer modelling and simulation has transformed the knowledge making practices of scientific fields as diverse as astro physics genetics robotics and demography This epistemic transformation has brought with it a simultaneous heightening of political relevance and a renewal of international policy agendas raising crucial questions about the nature and application of simulation knowledges throughout public policy Through a diverse range of case studies spanning over a century of theoretical and practical developments in the atmospheric and environmental sciences this book argues that computer modelling and simulation have substantially changed scientific and cultural practices and shaped the emergence of novel cultures of prediction Making an innovative interdisciplinary contribution to understanding the impact of computer modelling on research practice institutional configurations and broader cultures this volume will be essential reading for anyone interested in the past present and future of climate change and the environmental sciences **Decentering Epistemologies and Challenging Privilege** Sophie Bourgault, Maggie FitzGerald, Fiona Robinson, 2024-09-13 Care ethics first emerged as an attempt to decenter ethics feminist scholars like Carol Gilligan argued that women's moral experiences were not reflected in the dominant masculinist approaches to ethics which were centered on a rational disembodied atomistic moral subject Care ethics challenged this model by positing ethics as relational contextualized embodied and realized through practices rather than principles Over the past decades many care ethics scholars have sought to further this project by considering care politically and epistemologically in relation to various intersecting hierarchies of power and knowledge This book advances this project by discussing the ways care ethics contributes to the decentering of dominant epistemologies and to the challenging of privilege and by considering how to decenter care ethics itself via an encounter with non Western philosophical traditions and alternative epistemologies Written by scholars from different countries disciplines and intellectual traditions the volume

offers original care ethics contributions on epistemic injustice privileged irresponsibility ecofeminism settler colonialism
social movements such as BLM and various racialized and gendered inequities tied to care work
