

without putting more attention and good control on how students finish their tasks especially in writing the academic papers, the plagiarism issue might easily happen. The most popular terminology of plagiarism in academic paper writing is "copying-pasting". This phenomenon might be assumed as one of the worst academic crimes since it creates a bad habit of disrespecting the authors' ideas by simply claims the ideas as theirs instead of acknowledging the authors in the form of citation or references. In addition, the plagiarism doers will have lack of creative ideas to view an issue by using their reading insights. Besides, they will also have low reading exposure of academic literature because cheating never positively makes people to be good at any case at all.

In Indonesia current context of higher education, copying-pasting is mostly done by students when they were asked to write essays or any kinds of academic paper writing. They accessed internet and went to several or more websites that provided the information they needed. When they had found the most representative information, they simply copied the texts or paragraphs and just pasted them on their academic paper works without acknowledging the original sources such as the author's names, publishing year, journals titles, page of the texts they copied, and so on, as the ethic of writing procedure called as citation. Based on the above information, plagiarism in academic writing has been obviously crucial to be discussed further.

As a skill, writing can not be seen as a simple thing since it is related to many aspects. As what Pinter (2006: 74) stated, "writing is a complex skill progressing from the level of copying familiar words and phrases to developing an awareness of text structure, genres, the process of drafting and editing and writing for an audience". Students' writing skill in higher education has broader goals than just the mastery on how to write paragraphs, essays and stories. It has the same point as what Budiharto (2014: 866) states "writing skill for college students is not only focused on writing paragraph, story (either factual or imaginative story), kinds of genres and essay, but also academic writing". On the similar view, Ratulana and Machedo (2014) stated,

"the ability to write academically and ethically appropriate is something considered as "a must" than only an expectation, and this is an obligatory either for respondents or even for lecturers as intellectuals within their academic life circumstances". (p.791)

The final product of students' academic writing task in Indonesia undergraduate program is research paper. It becomes the primary requirement to decide whether or not the respondents graduate from college or university. According to Healey and Jenkins (2009: 3) "in undergraduate research, respondents learn and are assessed in ways that come as close as possible to the experience of academic staff carrying out their disciplinary research." It is believed that the importance of conducting research in undergraduate program meets the high expectation on what contribution that students may be able to share to the world. It can be seen from what stated by Ramaden (2008 in Healey and Jenkins, 2009).
