Educational Leadership in Becoming Nuraan Davids, Yusef Waghid, 2016-08-25

Educational Leadership in Becoming reconsiders educational leadership in its current forms and presents a more plausible form of educational leadership to contend with the complexities currently found in universities and schools. Much of the literature in vogue concerning educational leadership ranges from transactional to transformative representations of the concept in relation to educational management and policy, curriculum inquiry and pedagogical action. The primary aim of this book is to revisit some of the dominant understandings of educational leadership and to offer an extended view of the practice along the lines of potentiality and becoming. Davids and Waghid argue that all current forms of educational leadership are insufficient to enact responsible human action particularly when it comes to addressing the combined issues of globalisation and equitable redress and transformation whether in relation to leading schools or universities. The primary objective of the book is to draw on the Agambian notion of becoming in order to show that an educational leadership in becoming is better placed to not only address the myriad challenges besetting education but to also enhance the potential of leadership in action. The book addresses an international audience by analysing conceptions of transformative leadership and should be read by anyone who is interested in education and educational leadership as well as the impact of neoliberal agendas on education and society. It should also appeal to those interested in the philosophy of education.

Islamic Schooling in the West Mohamad Abdalla, Dylan Chown, Muhammad Abdullah, 2018-05-30 This book presents the views of leading scholars, academics and educators on the renewal of Islamic schools in the Western context. The book argues that as Islamic schools in Western contexts have negotiated the establishment phase, they must next embrace a period of renewal. Renewal relates to a purposeful synthesis of the tradition with contemporary educational practice and greater emphasis on empirical research substantiating best practices in Islamic schools. This renewal must reflect teaching and learning practices consistent with an Islamic worldview and pedagogy. It should also inform, among other aspects, classroom management models and relevant and contextual Islamic and Arabic studies. This book acquaints the reader with contemporary challenges and opportunities in Islamic schools in the Western context with a focus on Australia.

This book is a collection of real life experiences compiled as testimonies to encourage and inspire others to build and grow their relationship with God.
