**International Handbook of Career Guidance** James A. Athanasou, R. van Esbroeck, 2008-08-02 The International Handbook of Career Guidance represents a project of international professional cooperation. It is intended as a catalyst for reform and was designed to support the development of career guidance in the years to come. Working for over four years from Belgium and Australia we had the privilege to collaborate with over 50 colleagues throughout the world to produce this Handbook. In every instance we selected key researchers who have an established reputation in the field of career development. They agreed to be involved and we are grateful for their support in this major effort. In this handbook we have tried to bring together a collection that summarises the diverse aspects of career guidance. It is a synthesis of the domain of career and vocational guidance firstly for an international readership and secondly it is designed to act as a reference for academics, researchers and professionals in the expanding field of career development. For this reason the Handbook includes coverage of the background and history of guidance right through to poignant issues relating to careers in the modern world of work. Policy issues relating to the provision of careers services as well as professional issues relating to career education, career counselling, career assessment, program evaluation and research methodologies are covered.

*Education's Flashpoints* Jim Dueck, 2014-12-05 The education system is dealing with a concerted effort at making it more accountable and transparent. Whereas measurement of a quality education used to focus on inputs such as money spent, the new measurement is focused on student outcomes such as learning success determined by large scale standardized tests. This change in perspective assesses personnel and system performance using empirical data rather than perceptual information. Transparent access to data regarding student learning is uncomfortable to teachers' unions because it is difficult to explain away objective information. Their substantial success in reducing teacher workload and limiting management's activity is predicated on persuading the public that they are focused on students. In reality teachers are their clients and students are frequently disadvantaged as the unions pursue a less work more pay objective. Many politicians are complicit in this pursuit because they are reticent to embrace reform when confronted by such a powerful special interest. When considering issues which pit student best interests with those of teachers governments frequently side with teachers because they can vote whereas students cannot. Flashpoints emerge as data is introduced into the process for making decisions.
