

## 1. USING THE EXPANDER UNIT

1.1.1

### Before we begin.....

The Model 100 Expander Unit is designed to slot in behind the main Musician Synthesizer.

Fig. 1.1

Insert the expand unit into the bottom of the Musician Unit as shown in Fig. 1.1.

1.1.2

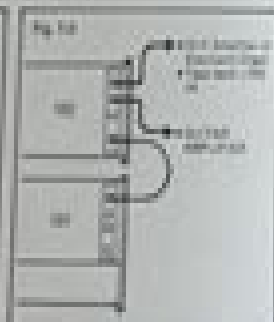

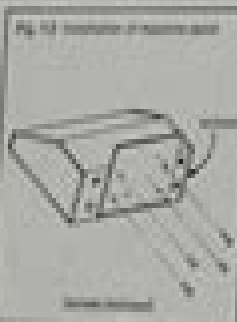

### The A2000 system.....

Note that with the 100 Synthesizer and 100 Expander Unit then their built-in A2000 network and that both networks have to be ON in order to use both units.

1.1.3

### Connections.....

Fig. 1.2 shows how to connect the two units together and to your amplifier.

1.1.4

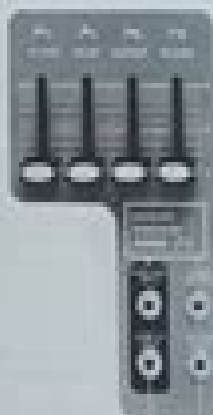

### Headphones.....

In order to monitor the output of both units, use the PHONES jack and 1.2 V.T.L. control on the Model 100 Expander Unit.

1.1.5

### The output of the A2000 control unit.....

Fig. 1.3

A2000.2 is exactly the same as A2000.1 except that the gain stage connection is made externally through a patch cord. (The main gain from the S.M. is the only internal connection for triggering A2000.2 and 2.2 V.T.L.)

1.1.6

### Experimenting with the two A2000's.....

In Patch 26 (A2000 Test), the 100 Synthesizer and the 100 Expander Unit are set to produce two different qualities of sound to make it easier to hear the control effects of the four used to connect the two A2000's.

In Patch 26a, the Tenthing key on the keyboard will show that A2000.1 is controlling both units.

In Patch 26b, striking a key now will show that both A2000's have separate control of their own units.

In Patch 26c, in this patch, A2000.2 controls both units.

In Patch 26d, in this patch, each A2000 controls its separate unit. There is no advantage in this arrangement, as it is of little value except as an experiment.

1.1.7

### The output effects.....

Patch 8 (Delayed Vibrato) shows how you can use A2000.2 to induce a delayed vibrato effect into any patch set on the 100 Unit. The main sound (Patch 26, MODEL 100 SYNTHESIZER PATCH BOARD) is a good patch to try this with.

# Roland Rg 100 Owners Manual
