

# How To Write A 1000 Word Essay

## **Introduction**

Assignment essays are developed from set questions that give students a period of time to research a topic and produce their answer with references to their sources of information. While there are some disadvantages with using assignment essays as an assessment tool, there are sound educational purposes underpinning this practice. This essay examines the reasons why assignment essays are beneficial for student learning and considers some of the problems with this method of assessment.

## **Body paragraph**

Assignment essay tasks are set to assist students to develop mastery of their study subject. Firstly, assignment tasks enhance understandings about subject matter. Yang and Baker (2005) reason that "to master your learning materials and extend your understandings, you need to write about the meanings you gain from your research". Secondly, research (Jinx, 2004; Zapper, 2006) clearly demonstrates that students learn the writing conventions of a subject area while they are researching, reading and writing in their discipline. This activity helps them to "crack the code" of the discipline (Bloggs, 2003, p. 44). Thus, students are learning subject matter and how to write in that disciplinary area by researching and writing assignment essays.

## **Conclusion**

To conclude, it seems that assignment essays continue to have a prominent role in tertiary education as an assessment tool. This is mainly because they are very effective in developing knowledge and writing skills for subject areas. Also, assignment essays can be less stressful than examinations as they allow students to show their understanding of content in less pressured circumstances. On the other hand, the time consuming nature of writing and marking essays points to some disadvantages that also need to be considered. The weight of evidence, however, supports the writing of assignment essays for student assessment because this approach has such positive and proven effects for improved student learning.
