Bio-based Wood Adhesives Zhongqi He, 2017-05-25 Adhesive bonding plays an increasing role in the forest product industry and is a key factor for efficiently utilizing timber and other lignocellulosic resources. As synthetic wood adhesives are mostly derived from depleting petrochemical resources and have caused increasing environmental concern, natural product and byproduct derived adhesives have attracted much attention in the last decades. Although adhesives made from plant and animal sources have been in existence since ancient times, increased knowledge of their chemistry and improved technical formulation of their preparation are still needed to promote their broader industrial applications. The primary goals of this book are to 1) synthesize the fundamental knowledge and latest research on bio based adhesives from a remarkable range of natural products and byproducts 2) identify need areas and provide directions of future bio based adhesive research and 3) help integrating research findings in practical adhesive application for maximal benefits. This book covers information on a variety of natural products and byproducts and the latest research on formulation testing and improvement of the relevant adhesives in fifteen chapters written by an international group of accomplished contributors. This book will serve as a valuable reference source for university faculty, graduate students, research scientists, agricultural and wood engineers, international organization advocates and government agency regulators who work and deal with enhanced utilization of agricultural and forest products and byproducts.

Salted and Cured Jeffrey Roberts, 2017 From country ham to coppa, bacon to bresaola, Prosciutto, Andouille, Country ham. The extraordinary rise in popularity of cured meats in recent years often overlooks the fact that the ancient practice of meat preservation through the use of salt, time and smoke began as a survival technique. All over the world, various cultures developed ways to extend the viability of the hunt and later the harvest according to their unique climates and environments, resulting in the astonishing diversity of preserved meats that we celebrate and enjoy today everywhere, from corner delis to white tablecloth restaurants. In *Salted and Cured*, author Jeffrey P. Roberts traces the origins of today's American charcuterie, salumi and other delights and connects them to a current renaissance that begins to rival those of artisan cheese and craft beer. In doing so, Roberts highlights the incredible stories of immigrant butchers, breeders, chefs, entrepreneurs and other craftspeople who withstood the modern era's push for bland industrial food to produce not only delicious but culturally significant cured meats. By rejecting the industry led push for the other white meat and reinvigorating the breeding and production of heritage hog breeds while finding novel ways to utilize the entire animal, snout to tail, today's charcutiers and salumieri not only produce everything from country ham to violino di capra but create more sustainable businesses for farmers and chefs. Weaving together agriculture, animal welfare and health, food safety and science, economics, history, a deep sense of place and amazing preserved foods, *Salted and Cured* is a literary feast, a celebration of both innovation and time honored knowledge and an expertly guided tour of America's culinary treasures, both old and new.
