

COMPANY CREDIT POLICY

PURPOSE

To define the requirements for establishing and maintaining credit lines and payment terms for Progressive Materials customers. This policy also provides alternative payment requirements for accommodating sales to customers who do not qualify for credit with Progressive Materials.

SCOPE

This Policy applies to all sales of Progressive Materials products to customers. All departments within Progressive Materials responsible for the sale, marketing, contract approval, order acceptance; scheduling and shipment of products must adhere to the policy and guidelines below.

POLICY

In order to facilitate the flow of orders and shipment of products, it is Progressive Materials Policy that credit will be extended to all customers who demonstrate both the ability to pay and history of timely payments of debts. Credit limits will be determined by comparing the following averages: customer's working capital, average credit limits granted by trade references and customer credit line needs. The credit department will evaluate all new customers to determine what payment terms and methods will be required and what level of credit will be established.

The credit department will also periodically review and re-evaluate payment terms and credit lines of existing customers to support new customer requirements and to manage risk as financial and business conditions change. In its day-to-day operations, the credit department will consistently adhere to all company policies regarding fair and equitable treatment in customer communications and relations.

RESPONSIBILITY

The credit manager is responsible for managing the credit review and approval process and accounts receivable balance to minimize collection exposure in accordance with the overall corporate operational and financial objectives.

It is the responsibility of the credit department to authorize all communications with the customers regarding credit acceptance status, credit line value, and payment terms and methods.

The credit department will authorize all communications with the customers and determine which financial information is required, and what dollar credit limit will be approved.

Elements of Structured Finance Ann Rutledge,Sylvain Raynes,2010-06-14 For all but the most credit worthy companies it is more efficient to finance large pools of assets that have predictable behavioral characteristics through non standard arrangements These off balance sheet structures allow credit exposures to be tailored to investor risk asset class and an ever increasing diversity of idiosyncratic needs on the part of issuers and investors The

discipline that addresses these structures which is called structured finance or securitization is almost twenty years old and has become a ubiquitous element of modern financial management Yet it has not been systematically covered in a textbook designed for both the school and workplace contexts Elements of Structured Finance the text version of a program of instruction in structured finance that the authors have offered at universities private training programs and consultancies fills this void spectacularly Raynes and Rutledge two very highly regarded teachers and consultants in the field bring clarity and logic to an inherently complex and frightening area of finance using their extensive experience working with many of the top Wall Street securities houses The book will start with the relatively simple concepts of static valuation models and the benchmark pool and take the reader through the more esoteric features of dynamic risk analysis thus serving as both an excellent introduction for the beginner and an essential reference for the professional In addition to participants in structured finance programs this book will appeal to structured finance analysts and managers at banks asset management companies insurance companies and a wide variety of other corporations
