Students in Special and Gifted Education National Research Council, Division of Behavioral and Social Sciences and Education, Board on Behavioral, Cognitive, and Sensory Sciences, Committee on Minority Representation in Special Education, 2002-08-30 Special education and gifted and talented programs were designed for children whose educational needs are not well met in regular classrooms From their inceptions these programs have had disproportionate representation of racial and ethnic minority students What causes this disproportion Is it a problem Minority Students in Special and Gifted Education considers possible contributors to that disparity including early biological and environmental influences and inequities in opportunities for preschool and K 12 education as well as the possibilities of bias in the referral and assessment system that leads to placement in special programs It examines the data on early childhood experience on differences in educational opportunity and on referral and placement The book also considers whether disproportionate representation

should be considered a problem Do special education programs provide valuable educational services or do they set students off on a path of lower educational expectations Would students not now placed in gifted and talented programs benefit from raised expectations more rigorous classes and the gifted label or would they suffer failure in classes for which they are unprepared By examining this important problem in U S education and making recommendations for early intervention and general education as well as for changes in referral and assessment processes Minority Students in Special and Gifted Education will be an indispensable resource to educators throughout the nation as well as to policy makers at all levels from schools and school districts to the state and federal governments
