in Relation to his Critique of Religion and Philosophical Teachings Anil Dominic Batti,2023-10-31 Arthur Schopenhauer 1788 1860 was perhaps the last polymath among the great Germanic philosophers Switching with ease and elegance between epistemic positions and fields as diverse as idealism and empiricism fideism and rationalism realism and nominalism art and religion jurisprudence and politics psychology and occultism Schopenhauer erected an imposing edifice bearing testimony to his universal learning This study is an investigation into the very conclusion of Schopenhauer s philosophy and endeavours to answer the following question did Schopenhauer s doctrine of salvation issue forth organically from his intellectual output or was it annexed to his philosophy as a result of his critical engagement with religion The labyrinthine paths through which Schopenhauer arrives at the soteriological culmination of his philosophy are subjected to critical assessment the picture that emerges is of a philosopher who seemed convinced that he had solved some of the most pressing cosmic riddles to have tormented mankind through the ages **Kierkegaard's Journals and Notebooks** Søren

In either case it is a natural and basic affection of the mind This analysis of hope will clarify the concept by dealing with its involvement in knowledge ethics and metaphysics Hope can lead to truth or error depending on whether it is a presentation of probabilities by the intellect or just a reflection of expectations from the will In this book a short survey of views on hope from the history of philosophy will be followed by an account of Schopenhauer s critical approach Hope will be treated within his framework of optimism and pessimism and of how it may serve as an important element in the critique of ideologies
