Chafer, E. Godin, 2010-06-01 Analyzes the notion of the French exception and the ways in which it has informed both academic analysis and political commentary on France today Adopting a comparative and interdisciplinary approach it examines the resilience of the notion of French exceptionalism and evaluates its relevance in a changing domestic and global context **Fictions of the Press in Nineteenth-Century France** Edmund Birch, 2018-05-04 This book explores how writers responded to the rise of the newspaper over the course of the nineteenth century Taking as its subject the ceaseless intertwining of fiction and journalism at this time it tracks the representation of newspapers and journalists in works by Honor de Balzac Edmond and Jules de Goncourt and Guy de Maupassant This was an era in which novels were published in newspapers and novelists worked as journalists In France fiction was to prove an utterly crucial presence at the newspaper s heart with a gilded array of predominant literary figures active in journalism Today few in search of a novel would turn to the pages of a daily newspaper But what are usually cast as discrete realms fiction and journalism came in the nineteenth century to occupy the same space a point which complicates our sense of the cultural history of French literature *Engaging Children and Youth in Africa* Ntarangwi, Mwenda, Massart, Guy, 2015-07-03 Representing research from east central west and southern Africa *Engaging Children and Youth in Africa* provides a well balanced analysis of on the ground data with methodological and phenomenological issues that abound in much of research in Africa today With an introduction that charts out some of the most critical approaches in African centred research on children and youth contributors to this volume give the reader a glimpse of the product of engaged research that places children and youth at the centre of analysis The authors follow recent studies that have insisted on seeing African childhood and youth beyond constraining Western notions of vulnerability or innocence to capture the ways in which recent advances in technology the intensification of global processes and continued weakening of the nation state have not only contributed to new ways of being children and youth but how they have also provided a new lens through which to study social change

Translation and Interdisciplinarity Faruk Yücel, Mehmet Tahir Öncü, 2022-12-12 Interdisciplinarity is significant in the age of globalization and digitalization It creates new opportunities through comparison and analysis of different findings and methods Furthermore it expands the boundaries of each discipline each topic or phenomenon can be viewed under a whole new light Instead of conventional or traditional methods interdisciplinary cooperation can lead to innovative approaches that can contribute to the value of each discipline involved It also requires respect and recognition between disciplines their

independent positions could be questioned or justified based on their interrelationship Moreover interdisciplinary work brings together diverse experts who cooperate and share their findings with each other In this sense interdisciplinarity can be seen as a dialogue between disciplines In this complex interaction a third field may emerge that transcends the boundaries of each independent discipline Since relatively young Translation Studies has long been influenced by other disciplines its boundaries could be defined through interdisciplinarity In this book numerous translation scholars engage with the relationship between translation and other disciplines Translation here is not only to be understood as a transmission of texts but in a broader sense as denoting a transformation of different phenomena that could be studied both as a product and as a process

Anthropology, Colonial Policy and the Decline of French Empire in Africa Douglas W. Leonard, 2019-12-26
 Conceived as both a vehicle to national prestige and as a civilizing mission the second French colonial empire 1830 1962 challenged soldiers scholars and administrators to understand societies radically different from their own The resultant networks of anthropological inquiry however did not have this effect Rather they opened pathways to political and intellectual independence framed in the language of social science and in the process upended the colonial political system and reshaped the nature of human inquiry in France While still unequal French colonial rule in Africa revealed the durability and strength of non European modes of thought In this influential new study historian Douglas W Leonard examines the political and intellectual repercussions of French efforts to understand and to dominate colonial Africa through the use of anthropology From General Louis Faidherbe in the 1840s to politician Jacques Soustelle and sociologist Pierre Bourdieu in the 1950s these French thinkers sowed the seeds of colonial destruction
