

## Chapter 2: Overview of the project

The first step in the project is to define the scope of the project. This involves identifying the goals and objectives of the project, and determining the resources and constraints. The next step is to develop a project plan, which outlines the tasks and activities that need to be completed, and the timeline for the project.

The project plan is then used to manage the project, and to ensure that the project is completed on time and within budget. The final step in the project is to evaluate the results of the project, and to determine the lessons learned.

## Chapter 3: Project Management

The project manager is responsible for the overall management of the project. This includes defining the project scope, developing the project plan, and managing the project resources. The project manager also monitors the project progress, and reports on the project status to the project sponsor.
