Abstract—The purpose of this study was to determine the effect of a 12-week training program on the heart rate (HR) and energy expenditure (EE) of sedentary, middle-aged women. The subjects were randomly assigned to a control group (CON) and an exercise group (EX). The EX group performed a 12-week training program consisting of three sessions per week of aerobic and resistance exercise. The CON group remained sedentary. HR and EE were measured at rest and during a 30-min submaximal walk. The EX group showed a significant decrease in HR at rest and during the walk, and a significant increase in EE at rest and during the walk. The CON group showed no significant changes in HR or EE. The results suggest that a 12-week training program can improve the cardiovascular and metabolic health of sedentary, middle-aged women.

If you are not satisfied with your results, follow the instructions carefully and test your original article. If the editor still requests the (a) paragraph and (b) and (c) paragraphs, repeat the analysis with the original data. The original data are available.

- The other two main reasons for the increase in the number of complaints are:
 - The fact that the number of complaints has increased in the last 12 months.
 - The fact that the number of complaints has increased in the last 12 months.

Abstract: This research was designed to investigate the effects of social support on the coping strategies of African American women who are victims of intimate partner violence. The study included 60 participants who were recruited from a community-based organization. Data were collected through a series of focus group discussions and individual interviews. The findings suggest that social support plays a significant role in the coping strategies of these women, particularly in terms of emotional support and information support. The study also identified several barriers to accessing social support, such as lack of resources and cultural stigma. The results have implications for the development of interventions aimed at enhancing social support for this population.
