Local Government in Japan Kurt Steiner,1965 A Stanford University Press classic

The Invention of Disaster JC Gaillard,2021-12-30 This theoretical contribution argues that the domination of Western knowledge in disaster scholarship has allowed normative policies and practices of disaster risk reduction to be imposed all over the world It takes a postcolonial approach to unpack why scholars claim that disasters are social constructs while offering little but theories concepts and methods supposed to be universal in understanding the unique and diverse experiences of millions of people across very different cultures It further challenges forms of governments inherited from the Enlightenment that have been rolled out as standard and ultimate solutions to reduce the risk of disaster Ultimately the book encourages the emergence of a more diverse set of world views senses and ways of knowing for both studying disasters and informing policy and practice of disaster risk reduction Such pluralism is essential to better reflect local realities of what disasters actually are around the world This book is an essential

read for scholars and postgraduate students interested in disaster studies as well as policy makers and practitioners of disaster risk reduction
