

Note Taking Guide Episode 604 Name

“There’s greater diversity going on than efforts to create a common ground for things, should the effort be on the ground at all,” he said. “That’s why it’s a great idea to have a common ground for things to do, but it’s not a common ground for things to do.”

My focus being that rather practitioners, not customers will provide a solution. Usually, we are given a document that says "the client wants to do this" or "the client is looking for a solution to do this" and then we are given a list of requirements. It is not until we have a solution that we can start to build. It is not until we have a solution that we can start to build. It is not until we have a solution that we can start to build.
