Nilson,2023-07-03 Most of our students neither know how learning works nor what they have to do to ensure it to the detriment both of their studies and their development as lifelong learners The point of departure for this book is the literature on self regulated learning that tells us that deep lasting independent learning requires learners to bring into play a range of cognitive skills affective attitudes and even physical activities about which

most students are wholly unaware and that self regulation which has little to do with measured intelligence can be developed by just about anyone and is a fundamental prerequisite of academic success Linda Nilson provides the theoretical background to student self regulation the evidence that it enhances achievement and the strategies to help students develop it She presents an array of tested activities and assignments through which students can progressively reflect on monitor and improve their learning skills describes how they can be integrated with different course components and on various schedules and elucidates how to intentionally and seamlessly incorporate them into course design to effectively meet disciplinary and student development objectives Recognizing that most faculty are unfamiliar with these strategies she also recommends how to prepare for introducing them into the classroom and adding more as instructors become more confident using them The book concludes with descriptions of courses from different fields to offer models and ideas for implementation At a time of so much concern about what our students are learning in college and how well prepared they are for the challenges of tomorrow s economy and society self regulated learning provides a reassuring solution particularly as studies indicate that struggling students benefit the most from practicing it

CURRICULUM-BASED ASSESSMENT

Charles H. Hargis,2013-03-01 Thoroughly updated and expanded this fourth edition focuses on the use of curriculum based assessment to ensure learning disabled and low achieving students adequate educational opportunities The text explores ways of providing detail and explanation in the context of current and emerging issues in educational assessment and standards The point that educational success is more than just avoiding failure is emphasized and throughout the book precise definitions and examples of various instructional situations are presented Shifting emphasis from identifying deficit areas to finding and inventorying skills and abilities CBA requires an intimate relationship between teaching and testing To help the instructor achieve this balance the author offers examples and methods of implementation through reading and arithmetic activities and discusses at length the issues involved in test validity and grading The primary objective of curriculum based assessment is the success of students and much of the book is devoted to its two primary steps finding the level on the curriculum where the student can succeed and then incorporating assessment practices in the daily teaching activities so that success is an ongoing affair To further update this edition two additional new chapters have been added The Paradox of Setting Standards by Grade Level and Assessing Writing The book s simple format readability and detailed descriptions of instructional methodology make it a significant resource Designed to assist instructors curriculum persons special educators and administrators the book will also be helpful to researchers counselors social workers and other professionals in human service organizations

The Roles of Social Media in Education: Affective, Behavioral, and Cognitive Dimensions Hung Phu Bui,Mark Bedoya Ulla,Veronico N. Tarrayo,Chien Thang Pham,2023-10-24 technologies in education A large body of research has attempted to measure the extent to which social media change human communication In education researchers and educators have employed social media to increase students engagement inside and outside the

classroom They have been exploring the effects of the use of social media on the learning outcome and learners beliefs and experiences However some of their endeavors are inconclusive As the effects of social media in education are context sensitive research results reflecting different contexts around the world will contribute to the literature on social media and education Student engagement in learning a growing interest in educational research is widely believed to contribute to the success of learning The contemporary literature shows that students can engage in learning affectively behaviorally and cognitively Recent studies are also interested in using technology to mediate students social and metacognitive engagement in learning As student engagement is a multidimensional area interdisciplinary studies have recently expanded their literature The use of social media to increase student engagement in learning remains underexplored
