The EX group performed a 12-week training program consisting of three sessions per week of aerobic and resistance training. The CON group did not exercise. The EX group showed a significant decrease in HR and a significant increase in EE compared to the CON group. The EX group also showed a significant increase in the number of steps taken per day. The EX group showed a significant increase in the number of steps taken per day. The EX group showed a significant increase in the number of steps taken per day.
