**Public Administration in East Asia** Evan M. Berman, 2017-09-25. Written by leading experts, *Public Administration in East Asia* (Mainland China, Japan, South Korea, Taiwan) examines the inner workings of governments in East Asia, in particular its public administration and related public policy processes. It focuses on the apparatus of government, the agencies, their values, context, and policies within which they operate. Organized in parallel sections, the book covers the history, public policy processes, organization, HRM, ethics, corruption, intergovernmental relations, performance management, and e-government. It discusses each of these topics separately for Mainland China, Japan, South Korea, and Taiwan, providing an unusual and important comparative perspective. The book includes essential knowledge and facts, discussions of emerging issues, and useful resources for further reading. It addresses questions such as: What is the history of public administration in East Asia? How are decisions made? What is the role of Confucianism in shaping public administration? How does the developmental path affect public administration? Why is performance management emphasized? What is the state of citizen participation? How are ethical underpinnings of the civil service different from the West? Why are intergovernmental relations an essential issue in East Asia? What are the politics behind world-class achievements in IT? What is the nature of civil service reform? What is the nature of efforts to combat government corruption? You can find many books on trade policy and politics that sometimes give good insight into the operation of government agencies. You can also find a few edited books that contain single chapters on countries in the Asia-Pacific region. What is missing, however, is a single resource that provides an overview with depth on matters solely about public administration. This state-of-the-art resource brings together the fragments of existing knowledge on East Asian economies, filling the need for a comprehensive compendium that showcases the public administration practices in the region and East Asia's innovative approaches to governance and its many challenges. *Power Brands*, Jesko Perrey, Tjark Freundt, Dennis Spillecke, 2015-04-27. *Dogfight* Fred Vogelstein, 2024-03-26 Behind the bitter rivalry between Apple and Google and how it is reshaping the way we think about technology The rise of smartphones and tablets has altered the industry of making computers At the center of this change are Apple and Google two companies whose philosophies leaders and commercial acumen have steamrolled the competition In the age of Android and the iPad these corporations are locked in a feud that will play out not just in the mobile marketplace but in the courts and on screens around the world Fred Vogelstein has reported on this rivalry for more than a decade and has rare access to its major players In *Dogfight* he takes us into the offices and board rooms where company dogma translates into ruthless business behind outsize personalities like Steve Jobs Apple's now lionized CEO and Eric Schmidt Google's executive chairman and inside the deals lawsuits and allegations that mold the way we communicate Apple and Google are poaching each other's employees They bid up the price of each other's acquisitions for spite and they forge alliances with major players like Facebook and Microsoft in pursuit of market dominance *Dogfight* reads like a novel vivid nonfiction with never before heard details This is more than a story about what devices will replace our cell phones and laptops It's about who will control the content on those devices and where that content will come from about the future of media and the Internet in Silicon Valley New York and Hollywood
