These self-reported behaviors were measured through four self-administered scales to assess perceived drinking habits. Because binge drinking was the focus of the study, the first self-rated questionnaire focused on the effect of binge drinking behavior. The self-rated questionnaire in this assessment, therefore, is a self-administered 10-item questionnaire and was composed of four items that all related to binge drinking. Specifically, the items stated that they did the appropriate behaviors described for the participant. These behaviors included drinking more than one alcoholic beverage per day and drinking more than one alcoholic beverage per week. The items were:
