discusses the role of exhibitions in the archives of tomorrow This is the first in depth study to consider exhibition as more than outreach or advocacy it frames exhibition as an encounter with archives and with people and interprets it as a mechanism for change within the archive Against a backdrop of increasing digital activity Lester asks what experience within the physical space of the archive could be Drawing on ideas of spatiality and embodiment as well as social justice and activism Lester considers the role of exhibitions within the physical archive and the part they can play in reshaping how experience is understood to happen within it Exhibiting the Archive offers a new perspective on the archive that will be of interest to academics and students engaged in the study of archives and records The discussions of cutting edge practice offer new insights into how exhibitions are conceived and made and will therefore be of interest to practitioners around the world

Deconstructing Digital Capitalism and the Smart Society Mel van Elteren, 2025-01-01 Today's critics of big online platforms tend to consider privacy breaches monopolistic practices and the deployment of surveillance technologies as the main problems Internet reformers suggest the answers to these issues reside in more and better regulations While the questions of privacy data and size are indeed important they are secondary however to a deeper set of concerns about platform ownership and control and who benefits from the current status quo This book examines these issues and offers an historical overview and in depth analysis of digital capitalism and its prevailing practices as it has become increasingly intertwined with various forms of online surveillance behavior modification and the delegation of managerial functions to algorithmic and automated systems in platform economies The approach taken extends to the wider array of data driven internet connected and automated systems that involve digital devices and technologies centered on three smart spaces the smart self the smart home and the smart city Antitrust and other regulatory measures by the European Union and the United States that are aimed at restraining platform capitalism are also discussed The focus in particular is on recent developments regarding artificial intelligence and their potentially harmful implications This is followed by a critical look at proposals for more far reaching institutional reforms revolving around the creation of forms of platform socialism that build partly on existing practices of platform cooperativism The book concludes with a diagnosis of the global situation among the competing digital empires the United States the European Union and China and considers whether or not under the present conditions any form of democratic platform socialism could materialize on a wider scale in the near future

The Evolution of Human Wisdom Celia Deane-Drummond, Agustín Fuentes, 2017-10-18 This volume addresses key questions about the puzzle of human origins by focusing on a topic that is largely unexplored thus far namely the evolution of human wisdom How can we best understand the human capacity for wisdom where did it come from and how did it emerge It explores lines of convergence and divergence between Christian theology and evolutionary anthropology in its search to identify different aspects of wisdom Critical to this discussion are the philosophical difficulties that arise when two very different methodological approaches to the manner of humans becoming wise are brought together The relative importance and significance of human language is another area of intense debate in defining the meaning of wisdom and its expression How far and to what extent does a theologically informed wisdom discourse push evolutionary anthropology to formulate new questions and vice versa This volume shows that there is no simple consonance between evolutionary anthropology and theology Yet each discipline has much to learn from the other the authors are in agreement that even in the midst of an awareness of dissonance and some tension there can still be mutual respect The goal of this book is to begin to develop a trans disciplinary approach to the evolution of human wisdom where each discipline is challenged to ask questions in a new way This volume tackles the relationship between theology and science in a fresh way by focusing on a specific theme wisdom that is equally generative for both theology and evolutionary anthropology

At the Center Casey Nelson Blake, Daniel H. Borus, Howard Brick, 2019-12-03 At a time when American political and cultural leaders asserted that the nation stood at the center of world

awareness thinkers and artists sought to understand and secure principles that lay at the center of things From the onset of the Cold War in 1948 through 1963 they asked What defined the essential character of American culture Could permanent moral standards guide human conduct amid the flux and horrors of history In what ways did a stable self emerge through the life cycle Could scientific method rescue truth from error illusion and myth Are there key elements to democracy to the integrity of a society to order in the world Answers to such questions promised intellectual and moral stability in an age haunted by the memory of world war and the possibility of future devastation on an even greater scale Yet other key figures rejected the search for a center asserting that freedom lay in the dispersion of cultural energies and the plurality of American experiences In probing the centering impulse of the era *At the Center* offers a unique perspective on the United States at the pinnacle of its power

Childlike Peace in Merleau-Ponty and

Levinas Brock Bahler,2016-08-01 By examining the parent child relationship Childlike Peace in Merleau Ponty and Levinas argues that the primordial structure of our personal encounters with others should be understood as a dialectical spiral Drawing on the work of twentieth century philosophers Maurice Merleau Ponty and Emmanuel Levinas and informed by recent advances in cognitive neuroscience and child development Brock Bahler develops a phenomenological description of the parent child relationship in order to articulate an account of intersubjectivity that is fundamentally ethically oriented dialogical and mutually dynamic This dialectical spiral in contrast to Cartesian tradition of the subject and the Hegelian master slave dialectic suggests that our lives are equiprimordially interwoven with both the richness of mutual engagement and the responsibility to be for the other The parent child relationship provides the basis for a theoretical account of intersubjectivity that is marked by a creative interaction between self and other that cannot be reduced to an economic exchange a totalizing structure or a unilateral asymmetrical responsibility In conversation with the philosophical thought of Merleau Ponty Levinas Hegel Sartre and Freud as well as recent research in cognitive neuroscience and child development this work will be of interest for those working in the fields of continental philosophy embodied cognition philosophy of childhood psychoanalysis psychology philosophy for children P4C and education **Automation and Utopia** John

Danaher,2019-09-24 Automating technologies threaten to usher in a workless future But this can be a good thing if we play our cards right Human obsolescence is imminent The factories of the future will be dark staffed by armies of tireless robots The hospitals of the future will have fewer doctors depending instead on cloud based AI to diagnose patients and recommend treatments The homes of the future will anticipate our wants and needs and provide all the entertainment food and distraction we could ever desire To many this is a depressing prognosis an image of civilization replaced by its machines But what if an automated future is something to be welcomed rather than feared Work is a source of misery and oppression for most people so shouldn't we do what we can to hasten its demise Automation and Utopia makes the case for a world in which free from need or want we can spend our time inventing and playing games and exploring virtual realities that are more deeply engaging and absorbing than any we have experienced before allowing us to achieve idealized forms of human flourishing The idea that we should give up and retreat to the virtual may seem shocking even distasteful But John Danaher urges us to embrace the possibilities of this new existence The rise of automating technologies presents a utopian moment for humankind providing both the motive and the means to build a better future *Informationelle Selbstgefährdung* Yoan

Hermstrüwer,2016-06-03 Die globale Datenverarbeitung zehrt an tradierten Freiheitsvorstellungen Das Datenschutzrecht soll informierte und freiwillige Entscheidungen über die Preisgabe persönlicher Informationen und Schutz gegen überwachungsbedingte Verhaltensanpassungen gewährleisten Aber kann das Recht dies überhaupt Yoan Hermstrüwer geht dieser Frage nach Mithilfe spieltheoretischer verhaltensökonomischer und empirischer Methoden analysiert er die bei der datenschutzrechtlichen Einwilligung zu bewältigenden Entscheidungsprobleme und die Auswirkungen der

Datenverarbeitung auf unser Verhalten Die verhaltenswissenschaftliche Hinterfragung der datenschutzrechtlichen Regelungsprinzipien muss nicht mit einer Hinwendung zum liberalen Paternalismus einhergehen Das Datenschutzrecht kann aber nur steuerungsfähig bleiben wenn es die Rationalität informationeller Selbstbestimmungsentscheidungen und die Wechselwirkungen zwischen Recht und sozialen Normen berücksichtigt
