Claim:
There are different aquatic systems with diverse organisms.

Evidence	Reasoning/Justification
Aquatic ecosystems have abiotic - temp, light, salinity, depth	Different organisms can tolerate different factors
Some organisms prefer fresh water vs. saltwater. Bull sharks + manatees tolerate both	Bull sharks and manatees are very different, but tolerate same conditions
Depth reduces light and increases pressure. Organisms deal with this differently.	Many types of adaptations exist to survive in these conditions
The geography of an aquatic environment can determine the life forms present.	Continental shelf gets lots of light, so there's many living things. Not so in the abyss.
Photosynthesis takes place in the neritic zone.	It is the most productive area of the ocean. Plankton are base of food chain.
Metabolism is affected by temp. Many species are cold-blooded.	Organisms can migrate or must have adaptations to survive.

Fugal Composition Dorene Groocock, 2003-02-28. Author Joseph Groocock analyzes each of the fugues individually, both verbally and diagrammatically, and includes such elements as overall structure, episodes, stretto, subsidiary subjects, and countersubjects. The appendices and index furnish a ready reference for the scholar or researcher seeking information or guidance on specific points. Meanwhile, the volume's editor supplies comparative analyses using current and previous scholarship on every fugue, illustrating where the author supports or challenges other viewpoints. In all, the analyses contained in *Fugal Composition* establish the extraordinary diversity of Bach's fugal style in such a way that readers gain a new understanding of these significant and beautiful works of music.
