Disciplines: Concepts, Case Studies, and Practical Implementation Fovet, Frederic,2021-01-22 Universal design for learning UDL has been hailed for over a decade as a revolutionary lens that allows campuses to shift their efforts to create inclusive environments In recent years UDL has gone beyond the field of disability and been explored with regards to international and indigenous students There is now a sizable body of literature that details the benefits of implementing UDL in higher education as well as a number of emerging studies examining the strategic challenges of developing UDL across institutions There is however still a relative paucity of research discussing the transformation of instruction or assessment in concrete terms Therefore there is a necessity for research and information on UDL that has already been implemented in classrooms and the practical examples of what this process of transformation looks like The Handbook of Research on

Applying Universal Design for Learning Across Disciplines Concepts Case Studies and Practical Implementation offers practical examples of UDL having successfully been embedded in courses within various disciplines and classroom formats as well as across the undergraduate and graduate sectors The chapters provide case studies and concrete examples of what the UDL reflection on practice might look like in specific faculties and departments While highlighting UDL in areas such as educational technology student engagement assignment design and inclusive education this book is ideally intended for inservice and preservice teachers administrators teacher educators higher education professors and leaders practitioners researchers academicians and students interested in the integration of UDL into strategic academic plans
