The Real Jaws Rachel Lee Perez, 2025-08-30 Explores the 1916 New Jersey shark attacks their impact on shark fear and how media shaped harmful misconceptions In the Summer of 1916 a series of shark attacks along the New Jersey shore would send shockwaves across its otherwise peaceful beach towns Spanning a terrifying two weeks including the deaths of nearly five people these attacks would officially cement an innate fear of sharks that humans have felt since the beginning of time Although initially kept under wraps by the tourism industry these attacks would ultimately plaster the front pages of newspapers across the United States and even overseas As the news spread the line between fact and fiction blurred reshaping our cultural and scientific understanding of the beasts of the ocean It was the 1916 shark attacks that would establish our modern day misconstrued perception of sharks as evil man eating monsters and would later inspire the film Jaws which would perpetuate the same harmful narrative The Real Jaws takes an in depth look at each one of the attacks and how they instilled a centuries long fear of the ocean's apex predator It

explores the various theories explaining why these attacks may have occurred and the probability of something like this happening again And finally it analyses the way the harmful misconceptions derived from films like Jaws have redefined humanity's relationship with sharks leading humans to become the predators and sharks to become the prey ECSM 2017 4th European Conference on Social Media Academic Conferences and Publishing Limited,2017-07-03 *International Development* Anna Lanoszka,2025-07-09 *International Development Strategies and Legacies of Socio Economic Development* examines the multifaceted challenges and strategies underlying socio economic progress in a globally interconnected world Grounded in a thorough historical and theoretical framework this book explores the evolution of developmental strategies from post colonial challenges the growing influence of international organizations and the role of state policies to the impacts of global market integration and demands for environmental sustainability It scrutinizes the effectiveness of international organizations and foreign aid agencies the resilience of local strategies and the persistent disparities shaped by historical legacies extractive and inclusive state institutions deficit of individual rights systemic poverty gender inequality armed conflicts environmental hazards and food insecurity Through case studies and document driven insights it highlights the intersection of institutional frameworks economic imperatives and human agency in shaping developmental outcomes By integrating environmental and sustainability considerations with economic strategies the book underscores the necessity of inclusive policies that address structural barriers and promote human centered development This new edition has been thoroughly updated to include material on decolonization the various effects of the Covid 19 pandemic gender and sexual orientation based discrimination climate change migration and economic insecurity With a multi disciplinary approach taking into account politics international relations economics sociology cultural studies and the history of development this book is an invaluable resource for students and scholars as well as policy makers and practitioners working and researching in those fields Theories of Change Karen Wendt,2021-05-07 Today it has become strikingly obvious that companies no longer operate in an environment where only risk return and volatility describe the business environment The business has to deal with volatility plus uncertainty plus complexity and ambiguity VUCA that requires new qualities competencies frameworks and it demands a new mind set to deal with the VUCA environment in investment funding and financing This book builds on a new megatrend beyond resilience called anti fragility We have had the black swan financial crisis and the red swan COVID the Bank for International Settlement is preparing for regenerative capitalism block chain based analysis of financial streams and is aiming to prevent the Green Swan the climate crisis to lead to the next lockdown In the light of the UN 17 Sustainable Development Goals what is required is Theories of Change Written by experts working in the fields of sustainable finance impact investing development finance carbon divesting innovation scaling finance impact entrepreneurship social stock exchanges alternative currencies Initial Coin Offerings ICOs ledger technologies civil action co creation impact management deep learning and transformation leadership the book begins by analysing existing Theories of Change frameworks from
