Self-Tracking Btihaj Ajana, 2017-10-01 This book provides an empirical and philosophical investigation of self tracking practices In recent years there has been an explosion of apps and devices that enable the data capturing and monitoring of everyday activities behaviours and habits Encouraged by movements such as the Quantified Self a growing number of people are embracing this culture of quantification and tracking in the spirit of improving their health and wellbeing The aim of this book is to enhance understanding of this fast growing trend bringing together scholars who are working at the forefront of the critical study of self tracking practices Each chapter provides a different conceptual lens through which one can examine these practices while grounding the discussion in relevant empirical examples From phenomenology to discourse analysis from questions of identity privacy and agency to issues of surveillance and tracking at the workplace this edited collection takes on a wide and yet focused approach to the timely topic of self tracking It constitutes a useful companion for scholars students and everyday users interested in the Quantified Self phenomenon

Deconstructing Digital Capitalism and the Smart Society Mel van Elteren, 2025-01-01 Today s critics of big online platforms tend to consider privacy breaches monopolistic practices and the deployment of surveillance technologies as the main problems Internet reformers suggest the answers to these issues reside in more and better regulations While the questions of privacy data and size are indeed important they are secondary however to a deeper set of concerns about platform ownership and control and who benefits from the current status quo This book examines these issues and offers an historical overview and in depth analysis of digital capitalism and its prevailing practices as it has become increasingly intertwined with various forms of online surveillance

behavior modification and the delegation of managerial functions to algorithmic and automated systems in platform economies The approach taken extends to the wider array of data driven internet connected and automated systems that involve digital devices and technologies centered on three smart spaces the smart self the smart home and the smart city Antitrust and other regulatory measures by the European Union and the United States that are aimed at restraining platform capitalism are also discussed The focus in particular is on recent developments regarding artificial intelligence and their potentially harmful implications This is followed by a critical look at proposals for more far reaching institutional reforms revolving around the creation of forms of platform socialism that build partly on existing practices of platform cooperativism The book concludes with a diagnosis of the global situation among the competing digital empires the United States the European Union and China and considers whether or not under the present conditions any form of democratic platform socialism could materialize on a wider scale in the near future Unknowing and the Everyday Seema

Golestaneh,2022-12-26 In Unknowing and the Everyday Seema Golestaneh examines how Sufi mystical experience in Iran shapes contemporary life Central to this process is *ma rifat* or unknowing the idea that as it is ultimately impossible to fully understand the divine humanity must operate from an engaged awareness that it knows nothing Golestaneh shows that rather than considering *ma rifat* an obstacle to intellectual engagement Sufis embrace that there will always be that which they do not know From this position they affirm both the limits of human knowledge and the mysteries of the profane world Through ethnographic case studies Golestaneh traces the affective and sensory dimensions of *ma rifat* in contexts such as the creation of collective Sufi spaces the interpretation of Persian poetry formulations of selfhood and non selfhood and the navigation of the socio material realm By outlining the relationship between *ma rifat* and religious aesthetic and social life in Iran Golestaneh demonstrates that for Sufis the outer bounds of human thought are the beginning rather than the limit

Realities in Pedagogical and Phenomenological Contexts Malte Brinkmann,Johannes Türistig,Martin Weber-Spanknebel,2025-05-28 What is real What is evident What is true These questions of the constitution of reality in our experiences are among the key questions of phenomenology since its beginning Lately they become especially relevant under conditions of digitalisation acceleration optimisation crises and pandemics In this volume these questions are taken up in different interdisciplinary and intercultural phenomenological perspectives from a pedagogical point of view Starting from a critique of instrumental scientism and optimisation the contributions in this book ask about the theoretical empirical methodological and practical constitution of reality within experiences of learning *Bildung* and education as well as the subjects materialities and mediality of such experiences in different pedagogical fields and institutions The contributions show how Phenomenological Pedagogy is fruitful to explore the realities of pedagogical practices by grasping lifeworldly lived bodily and social experiences in a qualitatively meaningful empirical and experience oriented way It can thus serve as an alternative to positivistic scientific idealistic or psychologistic approaches **At the Center** Casey Nelson Blake,Daniel H.

Borus,Howard Brick,2019-12-03 At a time when American political and cultural leaders asserted that the nation stood at the center of world awareness thinkers and artists sought to understand and secure principles that lay at the center of things From the onset of the Cold War in 1948 through 1963 they asked What defined the essential character of American culture Could permanent moral standards guide human conduct amid the flux and horrors of history In what ways did a stable self emerge through the life cycle Could scientific method rescue truth from error illusion and myth Are there key elements to democracy to the integrity of a society to order in the world Answers to such questions promised intellectual and moral stability in an age haunted by the memory of world war and the possibility of future devastation on an even greater scale Yet other key figures rejected the search for a center asserting that freedom lay in the dispersion of cultural energies and the plurality of American experiences In probing the centering impulse of the era *At the Center* offers a unique perspective on the United States at the pinnacle of its power

LSA Bulletin Linguistic Society of America,1996-10

The Evolution of Human Wisdom Celia Deane-Drummond,Agustín Fuentes,2017-10-18 This volume addresses key questions about the puzzle of human origins by focusing on a topic that is largely unexplored thus far namely the evolution of human wisdom How can we best understand the human capacity for wisdom where did it come from and how did it emerge It explores lines of convergence and divergence between Christian theology and evolutionary anthropology in its search to identify different aspects of wisdom Critical to this discussion are the philosophical difficulties that arise when two very different methodological approaches to the manner of humans becoming wise are brought together The relative importance and significance of human language is another area of intense debate in defining the meaning of wisdom and its expression How far and to what extent does a theologically informed wisdom discourse push evolutionary anthropology to formulate new questions and vice versa This volume shows that there is no simple consonance between evolutionary anthropology and theology Yet each discipline has much to learn from the other the authors are in agreement that even in the midst of an awareness of dissonance and some tension there can still be mutual respect The goal of this book is to begin to develop a trans disciplinary approach to the evolution of human wisdom where each discipline is challenged to ask questions in a new way This volume tackles the relationship between theology and science in a fresh way by focusing on a specific theme wisdom that is equally generative for both theology and evolutionary anthropology

Exhibiting the Archive Peter Lester,2022-06-24 Exhibiting the Archive examines the role that exhibition plays in archives and analyses the impact they are understood to have on how users and visitors experience the archive Drawing on research conducted in Europe North America and Australia the book analyses the key theoretical and social influences on exhibition making in archives today and discusses the role of exhibitions in the archives of tomorrow This is the first in depth study to consider exhibition as more than outreach or advocacy it frames exhibition as an encounter with archives and with people and interprets it as a mechanism for change within the archive Against a backdrop of increasing digital activity Lester asks what experience within

the physical space of the archive could be Drawing on ideas of spatiality and embodiment as well as social justice and activism Lester considers the role of exhibitions within the physical archive and the part they can play in reshaping how experience is understood to happen within it Exhibiting the Archive offers a new perspective on the archive that will be of interest to academics and students engaged in the study of archives and records The discussions of cutting edge practice offer new insights into how exhibitions are conceived and made and will therefore be of interest to practitioners around the world
