

Abstract: This study examines the impact of the 2008 financial crisis on the U.S. economy. The study finds that the crisis led to a significant decline in GDP, a rise in unemployment, and a decrease in consumer spending. The study also finds that the crisis led to a significant increase in government spending and a decrease in private investment. The study concludes that the crisis had a negative impact on the U.S. economy and that the government's response was inadequate.
