Nouvelles Approches En Morphologie:

Nouvelles approches en morphologie Bernard Fradin, 2003-08 En linguistique la morphologie est l'étude de la formation des mots et des variations de forme qu'ils subissent dans la phrase Ce manuel s'adresse tous ceux travaillant sur les sciences du langage enseignants étudiants mais aussi professionnels du langage La morphologie offre des voies d'accès privilégiées au lexique et aux problèmes que pose sa description Il est construit comme un essai permettant de comprendre les débats ayant animé le champ de la morphologie retracer les enjeux montrer les acquis sans dissimuler les problèmes soulevés L'auteur présente des idées et des démarches plus que des résultats et des recherches qui sont néanmoins présents Geschichte der Sprachwissenschaften Sylvain Auroux, Herbert Ernst Wiegand, 2000 Biographical note Sylvain Auroux is Professor at the ENS Lettres et Sciences Humaines University of Lyon France E F K Koerner is Professor at the Centre for General Linguistics Typology and Universals Research ZAS Berlin Germany Hans J Niederehe is Professor Emeritus for Romance Philology of the University of Trier Germany Kees Versteegh is Professor at the Institute of the Middle East of the University of Nijmegen Netherlands **Multilinguisme et traitement des langues naturelles** Ismaïl Biskri, Adel Jebali, 2011-04-22T00:00:00-04:00 Fruit du colloque international Multilinguisme et traitement automatique des langues tenu Ottawa le 11 mai 2009 les articles recueillis dans cet ouvrage présentent les dernières avancées scientifiques en matière de traitement automatique des langues et ce tant sur le plan théorique que de l'application Une description des méthodes d'évaluation des systèmes automatiques de détection des entités atypiques dans les ontologies ou encore d'autoconstruction assistée d'un lexique sémantique y est notamment proposée Des exemples d'environnements informatiques intégrant des outils de traitement automatique de la langue sont galement présentés tout comme une application d'autocorrection en cours de laboration destinée aux francophones rédigeant en anglais La pluridisciplinarité des auteurs les uns tant spécialistes en informatique les autres en linguistique ou en sciences cognitives de même que la multiplicité des langues étudiées par ceux-ci que ce soit le français l'anglais ou l'arabe offrent l'un des rares panoramas portant sur l'analyse et l'implémentation de phénomènes linguistiques The lexeme in descriptive and theoretical morphology Olivier Bonami, Gilles Boyé,orgette Dal, Hélène Giraud, Fiammetta Namer, 2018 After being dominant during about a century since its invention by Baudouin de Courtenay at the end of the nineteenth century morpheme is more and more replaced by lexeme in contemporary descriptive and theoretical morphology The notion of a lexeme is usually associated with the work of P H Matthews 1972 1974 who characterizes it as a lexical entity abstracting over individual inflected words Over the last three decades the lexeme has become a cornerstone of much work in both inflectional morphology and word formation or as it is increasingly been called lexeme formation The papers in the present volume take stock of the descriptive and theoretical usefulness of the lexeme but also address many of the challenges met by classical lexeme based theories of morphology Nouns and the Morphosyntax / Semantics Interface Laure Gardelle, Elise Mignot, Julie Neveux, 2024-03-21 This edited book seeks to bridge a gap in the

existing literature on nouns by exploring the exact relationship between their formal and semantic characteristics The introductory chapter offers a thorough state of the art on the morphosyntactic and semantic angles in definitions of nouns provides evidence of misalignments between morphosyntactic and semantic features and argues that a multi criterial angle is in fact inherent in the definition of the class of nouns The following chapters bring together a representative cross section of international level research on the morphosyntax semantics interface for nouns covering a wide variety of languages from French based creoles German and Japanese to English French Italian Russian and Uzbek The focus of the volume is to take a special focus on the currently underestimated dynamic interplay between morphosyntax and semantics at both language and discourse levels It will be of interest primarily to academics specialists of nouns as well as anyone interested in the interplay between morphology syntax and semantics and graduate students in areas such as syntax semantics morphology theoretical linguistics and discourse analysis

Sabellian Demonstratives Emmanuel Dupraz, 2011-12-09 Past research on the Sabellian languages has been devoted mainly to the phonetic and morphological features of these languages as elements for the reconstruction of the prehistoric stages of Latin The present book aims at analysing the semantic syntactic and pragmatic features of a subset of grammatical terms the demonstratives It contains a thorough description of their synchronic behaviour which permits both a comparison to the Latin data with new hypotheses on the epigraphic genres in Republican Italy and a reconstruction of the Italic origins of these terms based on typological principles Neither the grammar of Sabellian nor the pragmatic scope of the Sabellian inscriptions should be considered a priori identical to their Latin comparanda

Morphotactics: Volume 169 Gregory Stump, 2022-12-08 The study of morphology is central to linguistics and morphotactics the general principles by which the parts of a word form are arranged is essential to the study of morphology Drawing on evidence from a range of languages this is a comprehensive and up to date account of the principles of morphotactic analysis Stump proposes that the arrangement of word forms grammatically significant parts is an expression of the ways in which a language s morphological rules combine with one another to form more specific rules This rule combining approach to morphotactics has important implications for the synchronic analysis of both inflectional and derivational morphology and it provides a solid conceptual platform for understanding both the processing of morphologically complex words and the paths of morphological change Laying the groundwork for future research on morphotactic analysis this is essential reading for researchers and graduate students in linguistics and anyone interested in understanding language structure

Competition in Word-Formation Alexandra Bagasheva, Akiko Nagano, Vincent Renner, 2024-05-15 This volume focuses on a number of interrelated issues in the theorizing and interpretation of morphological rivalry including the differences between a semasiological and an onomasiological approach to competition phenomena in word formation the scope of such phenomena micro level rivalry between individual affixes as well as macro level competition between different processes the different sources of competition and the possible resolutions of competitive situations An overview of existing

Müller, Ingeborg Ohnheiser, Susan Olsen, Franz Rainer, 2015-03-30 This handbook comprises an in depth presentation of the state of the art in word formation The five volumes contain 207 articles written by leading international scholars The XVI chapters of the handbook provide the reader in both general articles and individual studies with a wide variety of perspectives word formation as a linguistic discipline history of science theoretical concepts units and processes in word formation rules and restrictions semantics and pragmatics foreign word formation language planning and purism historical word formation word formation in language acquisition and aphasia word formation and language use tools in word formation research The final chapter comprises 74 portraits of word formation in the individual languages of Europe and offers an innovative perspective These portraits afford the first overview of this kind and will prove useful for future typological research This handbook will provide an essential reference for both advanced students and researchers in word formation and related fields within linguistics

Interfaces in Language 3 Vikki Janke, Marina Kolokonte, 2014-08-11 This third volume of the Interfaces in Language series brings together a collection of papers which were presented at the University of Kent's Interfaces in Language 3 conference of May 2011 In line with the conference's title applications which held true to the interface theme were invited yet no restrictions were placed on the way in which interface was interpreted A range of talks were thus included some of which conformed to established demarcations within the discipline others of which flouted them entirely and unashamedly All were welcome The result was a heterogeneous set of talks interspersed with and complemented by lively discussions confirming that the interdisciplinary setting staged was a successful way of cultivating discussion between linguists who might otherwise not cross paths The papers chosen for publication here include both diachronic and synchronic approaches to language generative and non generative frameworks as well as typological and theory driven perspectives The result can only be described as an eclectic mix We invite the reader to decide upon its success
