Designing Denuclearization Bruce Larkin, 2018-02-06 This work canvasses nuclear weapon abolition proposals placed on the table since 1945 and the obstacles and issues which a realistic program for abolition confronts today It has an ambitious purpose to show that nuclear abolition can and should be placed on the public agenda a The author terms it interpretive in that it incorporates his commentaries never hiding his reasons and judgments It is neither just the facts nor all the facts It is an encyclopedia in the original meaning of a general course of instruction He identifies himself with all who pursue the problem posed by nuclear weapons systematically and with seriousness of purpose committed to self instruction In another sense he writes this work is a conversation with the Reader What is needed to abolish nuclear weapons His starting point is this As long as nuclear weapons are stockpiled and deployed there is risk of their use which would be catastrophic Abolition however is inconceivable in the absence of a developed and articulated alternative to the nuclear status quo Even with that the politics of abolition bringing the governments of the nuclear weapon states to believe that abolition is in their interest is the sine qua non of achieving a world free of nuclear weapons Larkin s text is written for those whether practitioners or citizens interested in designing and bringing about denuclearization Abolition cannot be achieved by political elites in the absence of broad concurrent public support Governments career policy officials and legislators have chosen to assume responsibility for the public agenda They may be asked must be asked what they will do to bring about denuclearization
