Nuclear Terrorism and Global Security Alan J. Kuperman, 2013-04-17 This book examines the prospects and challenges of a global phase out of highly enriched uranium and the risks of this material otherwise being used by terrorists to make atom bombs Terrorist groups such as Al Qaeda have

demonstrated repeatedly that they seek to acquire nuclear weapons Unbeknownst even to many security specialists tons of bomb grade uranium are trafficked legally each year for ostensibly peaceful purposes If terrorists obtained even a tiny fraction of this bomb grade uranium they could potentially construct a nuclear weapon like the one dropped on Hiroshima that killed tens of thousands Nuclear experts and policymakers have long known of this danger but so far have taken only marginal steps to address it This volume begins by highlighting the lessons of past successes where bomb grade uranium commerce has been eliminated such as from Argentina s manufacture of medical isotopes It then explores the major challenges that still lie ahead for example Russia s continued use of highly enriched uranium HEU in dozens of nuclear facilities Each of the book s thirteen case studies offers advice for reducing HEU in a specific sector These insights are then amalgamated into nine concrete policy recommendations for U S and world leaders to promote a global phase out of bomb grade uranium This book will be of much interest to students of nuclear proliferation global governance international relations and security studies

Daily Graphic Kingsley Inkoom,2014-09-03 **From GCSEs to EBCs** Great Britain. Parliament. House of Commons. Education Committee,2013 The Government s plans for replacing GCSEs with new English Baccalaureate Certificates in some subjects is trying to do too much too fast Introducing several fundamental changes at the same time and to a tight timetable will jeopardise the quality of the reforms and may threaten the stability of the wider exam system GCSEs need significant improvements in order to restore public confidence in the exam system but the Government still needs to make the case that the GCSE brand is so discredited that it is beyond repair MPs are also concerned about the impact of the changes on subjects outside the English Baccalaureate where students will be taking GCSEs for some time to come according to the Government s plans The report also questions how well the Government s proposals will serve lower attaining pupils who are often the most disadvantaged There is no evidence that the proposed changes will help to tackle under achievement or narrow the attainment gap between the richest and poorest students any more effectively than GCSEs The Government is also called upon to re think its plans for a Statement of

Achievement specifically for lower attaining pupils MPs agree that changes are needed to the way in which exams are run but they raise serious concerns about franchising subjects to exam boards The report is critical of the Government's decision to abolish some GCSEs before publishing the outcomes of the National Curriculum Review and its proposed changes to the school accountability system MPs also note the wide ranging stakeholder opposition to many of the Government's proposals
