Modelling Approaches to Understand Salinity Variations in a Highly Dynamic Tidal River Ali Dinar Abdullah,2017-03-16 This book reports the first systematic monitoring and modelling study on water availability water quality and seawater intrusion of the Shatt al Arab River SAR on the border of Iraq and Iran where causes and concentration levels of salinity have not yet been fully understood let alone addressed leading to conflicting perceptions of its origin external or internal the natural conditions and the practices that can explain the current critical conditions Current scientific knowledge on the SAR salinity problem is deficient partially due to the complex and dynamic interaction between marine and

terrestrial salinity sources including return flows by water users of the different water sectors in the Euphrates and Tigris rivers upstream of the SAR The development of a new series of monitoring stations and various modelling approaches helped to better understand the interactions between these different sources The comprehensive and detailed dataset formed the basis for a validated analytical model that can predict the extent of seawater relative to other salinity sources in an estuary and for a hydrodynamic model that can predict salinity changes The adaptability of the models to changing conditions makes them directly applicable by water managers The procedure can be applied to other comparable systems **Study on**

impacts of farmer-led research supported by civil society organizations Wettasinha, C., Waters-Bayer, A., van Veldhuizen, L., Quiroga, G., Swaans, K., 2015-01-15 Decades of scientific research related to agriculture and natural resource management have brought limited benefits to smallholder farmers including crop farmers fishers livestock keepers and other resource users Therefore donors policymakers and civil society organizations CSOs such as farmer organizations and nongovernmental organizations NGOs are urging the formal research sector to make its work more useful to smallholder farmers Many institutions of agricultural research and development are now seeking ways to engage more closely with smallholders in order to conduct research that is more relevant for and accessible to them and are seeking examples and good practices as sources of learning Some examples of research that is focused on smallholders and in which the process is co managed and driven by smallholders can be found in informal research initiatives specifically those which are facilitated by CSOs The purpose of this study was to identify such examples of informal agricultural research and development that could be documented and thus made accessible to formal researchers This report also describes farmer led research findings and their dissemination and analyzes available evidence on the impact of farmer led approaches to agricultural research and development on rural livelihoods local capacity to innovate and adapt and influence on governmental institutions of agricultural research and development **Impacts of Climate Change on Food Security in Small Island Developing**
