Advances in Computer Graphics Hardware V Richard L. Grimsdale, Arie Kaufman, 2012-12-06 This volume contains papers representing a comprehensive record of the contributions to the fifth workshop at EG 90 in Lausanne The Eurographics hardware workshops have now become an established forum for the exchange of information about the latest developments in this field of growing importance The first workshop took place during EG 86 in Lisbon All participants considered this to be a very rewarding event to be repeated at future EG conferences This view was reinforced at the EG 87 Hardware Workshop in Amsterdam and firmly established the need for such a colloquium in this specialist area within the annual EG conference The third EG Hardware Workshop took place in Nice in 1988 and the fourth in Hamburg at EG 89 The first part of the book is devoted to rendering machines The papers in this part address techniques for accelerating the rendering of images and efficient ways of improving their quality The second part on ray tracing describes algorithms and architectures for producing photorealistic images with emphasis on ways of reducing the time for this computationally intensive task The third part on visualization systems covers a number of topics including voxel based systems radiosity animation and special rendering techniques The contributions show that there is flourishing activity in the development of new algorithmic and architectural ideas and in particular in absorbing the impact of VLSI technology The increasing diversity of applications encourage new solutions and graphics hardware has become a research area of high activity and importance
