**Admissions Data Sourcebook Northeast Edition** ,      *Bihar and Mithila* J. Albert Rorabacher,2016-09-13 The world has  
become obsessed with the Western notions of progress development and globalization the latter a form of human and  
economic homogenization These processes through the aegis of the United Nations are comparatively monitored Those  
nations deemed to be lagging behind are then provided with foreign aid and developmental assistance For nearly seventy  
years India has sought its place in this global endeavour yet even today abject poverty and backwardness can be observed in  
districts in almost every state with the highest concentration of such districts found in the state of Bihar and a cultural  
enclave known as Mithila Development in India has been elusive because it is difficult to define and because the Western  
concepts of development and progress have no absolute equivalents within many non Western settings As a consequence  
development programmes often fail because they are unable to ask the right questions but equally important is the political

economy derived from foreign aid For politicians there is no long term benefit to be derived from successful development In general foreign aid only serves to corrupt governments and politicians and in the end does very little for those who need help The struggling states of Bihar and Mithila serve as extreme examples of India s problems Development here has been thwarted by a hereditary landed aristocracy supported by religion casteism custom social stratification tradition and patterns of behaviour that can be traced back millennia In turn all these have been masterfully manipulated by co opted politicians who have turned politics into a veritable art form as this volume comprehensively demonstrates The political ecology of colonial capitalism Bikrum Gill,2024-11-05 This book situates the post financial crisis phenomenon of the global land grab within the longue duree of the capitalist world system It does so by advancing a theoretical and historical framework called the political ecology of colonial capitalism that clarifies the key role played by the co production of race and nature in provisioning the ecological surplus that has historically secured the emergence and reproduction of capitalist development The key premise of this book is that the global land grab constitutes another such attempted moment of re securing the cheap food premise through racialized frontier appropriation The argument advanced here is that within the neoliberal crisis conjuncture the hegemonic resolution of capital s escalating social ecological contradictions necessitates through the practice of global primitive accumulation the racialized construction of frontiers of unused nature in emergent zones of appropriation **Federal Register Index** ,2010 **The Land Question in China** Shaohua Zhan,2019-01-15 This book interrogates the inevitability and practicability of full scale land intensive capitalist agriculture in China whilst analyzing the labor intensive industrious revolution as an alternative rural development path It presents a critical account of the recent rise of agrarian capitalism as a force that would undermine hundreds of millions of people s livelihoods in the populous country The Land Question in China traces the roots of the industrious revolution in China back to the eighteenth century drawing comparisons between contemporary rural development and economic prosperity in the mid Qing dynasty In the context of neoliberal restructuring it argues that vigorous rural development with broad access to land offers a solution to mitigate precarious urban employment and population pressure while the transfer of land from villagers to large producers and urban investors will exacerbate these problems Comparisons with South Africa and the East Asian economies of Japan South Korea and Taiwan further illustrate this and help to develop a new interpretation of the industrious revolution and its contemporary relevance Providing a critical examination of the new land reform in China from a world historical perspective this book will be useful to students and scholars of sociology economics and development as well as Chinese Studies **Handbook of Choice Modelling** Stephane Hess,Andrew Daly,2014-08-29 The Handbook of Choice Modelling composed of contributions from senior figures in the field summarizes the essential analytical techniques and discusses the key current research issues The book opens with Nobel Laureate Daniel McFadden calling for d **World Cities and Urban Form** Mike Jenks,Daniel Kozak,Pattaranan Takkanon,2013-12-02 This book presents new research and theory at the regional scale showing the forms

metropolitan regions might take to achieve sustainability At the city scale the book presents case studies based on the latest research and practice from Europe Asia and North America showing how both planning and flagship design can propel cities into world class status and also improve sustainability The contributors explore the tension between polycentric and potentially sustainable development and urban fragmentation in a physical context but also in a wider cultural social and economic context
