The Mediterranean Basin represents a very interesting arena that is able to illustrate labour conditions and mobility, the competition among different farming models and the consequences in terms of the proletarianization process, food crisis and diet changes. *Migration and Agriculture* brings together international contributors from across several disciplines to describe and analyse labour conditions and international migrations in relation to agri-food restructuring processes. This unique collection of articles connects migration issues with the proletarianization process and agrarian transitions that have affected Southern European as well as some Middle Eastern and Northern African countries in different ways. The chapters present case studies from a range of territories in the Mediterranean Basin, offering empirical data and theoretical analysis in order to grasp the complexity of the processes that are occurring. This book offers a uniquely comprehensive overview of migrations, territories and agro-food production in this key region and will be an indispensable resource to scholars in migration studies, rural sociology, social geography and the political economy of agriculture. The UK Regional-National Economic Problem Philip McCann, 2016-03-10 In recent years the United Kingdom has become a more and more divided society with inequality between the regions as marked as it has ever been In a landmark analysis of the current state of Britain s regional development Philip McCann utilises current statistics examines historical trends and makes pertinent international comparisons to assess the state of the nation The UK Regional National Economic Problem brings attention to the highly centralised top down governance structure that the UK deploys and demonstrates that it is less than ideally placed to rectify these inequalities The North South divide in the UK has never been greater and the rising inequalities are evident in almost all aspects of the economy including productivity incomes employment status and wealth Whilst the traditional economic dominance of London and its hinterland has continued along with relative resilience in the South West of England and Scotland in contrast the Midlands the North of England Northern Ireland and Wales lag behind by most measures of prosperity This inequality is greatly limiting national economic performance and the fact that Britain has a below average standard of living by European and OECD terms has been ignored The UK s economic and governance inequality is unlikely to be fundamentally rebalanced by the current governance and connectivity trends although this definitive study suggests that some areas of improvement are possible if they are well implemented This pivotal analysis is essential reading for postgraduate students in economics and urban studies as well as researchers and policy makers in local and central government

*Business, Peacebuilding and Sustainable Development* Jason Miklian, Rina Alluri, John Elias Katsos, 2019-05-29 The intersection of business peace and sustainable development is becoming an increasingly powerful space and is already beginning to show the capability to drive major global change This book deciphers how different forms of corporate engagement in the pursuit of peace and development have different impacts and outcomes It looks specifically at how the private sector can better deliver peace contributions in fragile violent and conflict settings and then at the deeper consequences of this agenda upon businesses governments international institutions and not least the local communities that are presumed to be the beneficiaries of such actions It is the first book to compile the state of the field in one place and is therefore an essential guide for students researchers policy makers and practitioners on the role of business in peace Without cross disciplinary engagement it is hard to identify where the cutting edge truly lies and how to take the topic forward in a more systematic manner This edited book brings together thought leaders in the field and pulls disparate strands together from business ethics management international relations peace and conflict studies in order to better understand how businesses can contribute to peacebuilding and sustainable development Before businesses take a deeper role in the most complicated and risky elements of sustainable development we need to be able to better explain what works why it works and what effective business efforts for peace and development mean for the multilateral institutional frameworks This book does just that
