

JANUARY ... DOES IT BRING YOU JOY?

- 1 January is the time for renewal on many fronts. It's the time of the year to re-evaluate everything. If something or someone doesn't bring you joy, it's pretty pointless carrying on with it. If we want the best, we must do our best. We must keep our family space safe and secure so that we are thriving as a people and as a nation. 5
- 2 In order to live their best lives, people are spreading themselves thinner and thinner with multiple streams of income. In the process we earn more but live less, we lose our focus of what is important.
- 3 With social media, keeping up with other Instagrammers are having a devastating effect on self-perception. Everything appears to be real perfect, but the fabric of our society is frazzled. Use January to take stock and start navigating new ways of doing things. Instead of multiple streams of sole sessions, travel more, and connect with people and places that bring you joy. 10

Environmental Taxation and Climate Change Hope Ashiabor,Larry Kreiser,Julsuchada Sirisom,Janet E. Milne,2011 Whilst green taxes face new challenges there is now an accumulated international experience on which to reflect This new collection of papers providing material for further vigorous argument evinces a keen appreciation of these realities I recommend this generally very readable book as a helpful reflection of some recent key concerns in the environmental policy area It constitutes a welcome addition to the literature inviting critical responses from the specialist but also drawing in the newcomer to the subject John Snape University of Warwick UK The

level of public and political debate on carbon taxes is low. Politicians fear the impact of a carbon tax on businesses and low income groups as well as on their popularity among voters. This valuable book studies carbon taxes from many angles with ample attention paid to practical examples and shows that a smartly designed carbon tax is an indispensable instrument in the transition to a less carbon dependent economy. Jonathan Verschuuren, The University of Sydney, Australia and Tilburg University, The Netherlands. Containing an authoritative set of original essays, *Environmental Taxation and Climate Change* provides fresh insights and analysis on how environmental sustainability can be achieved through fiscal policy. Written by distinguished environmental taxation scholars from around the world, this timely volume covers a range of hotly debated subjects including carbon related taxation in OECD countries, implications of environmental tax reforms, innovative environmental taxation and behavioural strategies as well as many other relevant topics. This up to date and well informed book will appeal to policymakers in government as well as students, researchers and academics in environmental law and other academic disciplines.

The European Environmental Conscience in EU Politics Thomas Hoerber, Gabriel Weber, 2021-12-06. Based on empirical studies of European energy and environmental policies, this book suggests that in combination these two policy fields form a consensus in the EU which might also become the basis for a new European ideology, namely European sustainability. It asks why an environmental conscience has grown since the late 1960s in the industrialised world and shows that whilst there is undeniable environmental degradation during this time and that a European environmental conscience has mainly developed through successive steps of European integration in energy policy. In this connection between energy and the environment, we find one driver for European integration and indeed European identity. If sustainability should become a European ideology, it will substantially influence the way future Europeans will live. This book will be of key interest to scholars and students of European Studies, International Relations, Political Science, History, Economics, Sustainability Studies, Environmental and Energy Policies in Europe.
