Africa's Geography Benjamin Ofori-Amoah, 2019-04-30 Africa's Geography presents a comprehensive exploration of the world's second largest and most culturally diverse continent. Author Benjamin Ofori-Amoah challenges common misconceptions and misrepresentations of Africa from a geographical perspective, harnessing the power of modern geographic mapping technology to explore this unique continent. This text provides thorough coverage of the historical, cultural, economic, and political forces that continue to shape Africa, applying geographic context to relevant past and contemporary issues. Coverage of economic development, climate and biogeography, transportation and communication, manufacturing and commerce, and mining and agriculture provides foundational knowledge of this vast and complex continent. Ideally suited for multiple areas of classroom study, this text offers an effective and flexible pedagogical framework. Coverage of the entirety of Africa enables students to develop a cohesive portrait of the continent as a whole and identify the dynamism of its nations, cultures, and economies. Engaging and accessible narrative strengthens comprehension, while examples of historical and contemporary events increase student interest. Innovative and unique, Africa's Geography is an essential resource for cross-disciplinary investigation of this fascinating part of the world.

Theories of Affect and Concepts in Generic Skills Education Wera Grahn, Edyta Just, 2017-08-21 During the last few years, the concept of generic skills and competences has become widespread across universities. An introduction to generic competences is as such important because it enables redefinition of educational goals and may positively rearrange forms of interaction in classes. It also indicates that education should inspire students to develop and use critical and creative forms of thinking, feeling, and doing. On the one hand, the need to promote generic skills can be seen as driven by neoliberal desire. On the other, however, generic competences can enable students to think, feel, and act differently but also respect and welcome various forms of life and ways of living. Responding to the growing need to reflect upon generic competences, this book contributes to the various ways of conceptualising generic skills and the methods in which they might be acquired. The volume engenders adventurous encounters between different theories which predominantly come from the feminist conceptual framework that result in appealing meanings of affect and concepts. It also experimentally explores and discusses ways in which theories of affect and concepts may complicate understanding of generic competences and inspire generic skills-oriented education. Consequently, this collection revitalizes the concept of generic skills but also advocates daring pedagogical practices that invigorate the meaning of and approach to teaching and learning in present landscapes of higher education.

Food-Energy-Water Systems: Achieving Climate Resilience and Sustainable Development in the 21st Century Charles Vörösmarty, Richard Lawford, Pietro Elia Campana, Donald Wuebbles, Graham Jewitt, 2024-01-23 Extreme weather will mean ongoing challenges to the capacity of these sectors to support human well-being, grow the economy, and provide critical environmental services. Society has yet to evaluate the resilience of FEWS to climate environmental and management stresses as it shapes strategies to support sustainable development over the next decades. These issues constitute a

quintessential interdisciplinary research challenge and require a well structured science agenda and supportive information services for implementing key findings that governments and stakeholders can adopt Integrated policy pathways require usable research findings applications models real time information systems and decision support systems In addition stakeholder engagement is essential to communicate the benefits and results of these approaches and to engage appropriate groups in their implementation

Urban Freight, land use planning and public administration strategies Edoardo Marcucci, Valerio Gatta, Laetitia Dabanc, 2019-11-25 Cities are the engines of an innovation based economy where research and new ideas are the core input of production Urbanisation is becoming synonymous of economic growth People flock into cities both in the developed and developing world since here is where wealth is where high quality services are available and life standards are comparatively higher with respect to other places However one has to acknowledge that growth also produces undesired negative effects In fact cities are net importers They need to acquire consumption intermediate goods export production and get rid of waste In other words the existence of a city relies on a transportation system providing the necessary services for its functioning The typical urban transportation system heavily depends on passenger and freight movements by road While this dependency is in some cases less relevant for passenger transport most of freight moved in out within and through a city relies on motorized road transportation Trucks and vans are responsible for congestion polluting emissions accidents noise visual intrusion and stench All these negative effects are concentrated where many citizens live and consequently produce relevant economic e g time lost environmental e g air quality and social e g segregation impacts Cities to be attractive sustainable and thriving need an efficient freight transportation system Fast changing consumption patterns with the rise of e commerce and home deliveries also point out to another dimension of cities their need to adapt quickly to economic trends

Stalemate Andrew Ong, 2023-06-15 *Stalemate* reveals the history and contemporary politics of the United Wa State Army UWSA Asia's strongest insurgent army on Myanmar's border with China. This ethnographic tale recounts how a highland group often dismissed as rebels or narcotraffickers maintains a relational autonomy between two powerful lowland states. The Wa polity engages rather than evades these surrounding states yet struggles to fit into their registers of sovereignty and statehood. Andrew Ong examines political culture among Wa elites and people, UWSA external relations and capital flows with neighboring China, showing how Wa autonomy is enacted through careful navigation of complex borderland geopolitics and the shadow economy. He analyzes the seeming stalemate between the Myanmar state and the UWSA as one of tactical dissonance, adopting simultaneous postures of authority and subordination and creating disruptions and connections. *Stalemate* illuminates how seemingly ambiguous and disorderly practices of political signaling, economic regulation and military governance produce relative stability, challenging our assumptions about state-like processes at the peripheries.

Normal Instructor and Teachers World, 1924 *The Routledge Companion to Behavioural Accounting Research*
Theresa Libby, Linda Thorne, 2017-11-06 Behavioural research is well established in the social sciences and has flourished in the field of accounting in recent decades. This far-reaching and reliable collection provides a definitive resource on current knowledge in this new approach as well as providing a guide to the development and implementation of a Behavioural Accounting Research project. *The Routledge Companion to Behavioural Accounting Research* covers a full range of theoretical, methodological and statistical approaches relied upon by behavioural accounting researchers, giving the reader a good grounding in both theoretical perspectives and practical applications. The perspectives cover a range of countries and contexts, bringing in seminal chapters by an international selection of behavioural accounting scholars, including Robert Libby and William R. Kinney Jr. This book is a vital introduction for Ph.D. students as well as a valuable resource for established behavioural accounting researchers. *Popular Educator*, 1925 *Tourism, Hospitality and Digital Transformation* Kayhan Tajeddini, Vanessa Ratten, Thorsten Merkle, 2019-10-08 Innovation and technological advancements can be disruptive forces, especially for conventional business in the hospitality and tourism industries. This book is timely with its critical examination of such forces and how the two industries should strategize and respond to changes effectively. It examines a wide scope of topics from environmental scanning, formulation, implementation and evaluation to the way managers make strategy choices for better organizational performance. The book illustrates how companies can re-orient their strategies and appraise the effectiveness of the business, its key competitors and how they should set business goals through various cases, i.e. different types of hospitality and tourism business from traditional hotels to Airbnb and endeavors to provide strategic conceptual theories with real-world application through such case studies. *Social Dynamics of the Urban* N.
