Smullyan on Self Reference Melvin Fitting, Brian Rayman, 2018-01-11 This book collects for the first time in one volume contributions honoring Professor Raymond Smullyan's work on self reference. It serves not only as a tribute to one of the great thinkers in logic but also as a celebration of self reference in general to be enjoyed by all lovers of this field. Raymond Smullyan, mathematician, philosopher, musician, and inventor of logic puzzles, made a lasting impact on the study of mathematical logic. Accordingly, this book spans the many personalities through which Professor Smullyan operated, offering extensions and re-evaluations of his academic work on self reference, applying self-referential logic to art and nature, and lastly offering new puzzles designed to communicate otherwise esoteric concepts in mathematical logic in the manner for which Professor Smullyan was so well known. This book is suitable for students, scholars, and logicians who are interested in learning more about Raymond Smullyan's work and life.

Social Statistics Roger Penn, Damon Berridge, 2010-06-15 Statistics and statistical analyses have become a key feature of contemporary social science. Social statistics is the use of statistical measurement systems to study human behavior in a social environment. This can be accomplished through polling a particular group of people, evaluating a particular subset of data obtained about a group of people, or by observation and statistical analysis of a set of data that relates to people and their behaviors. This major reference collection brings together the classic pieces that have framed the often controversial debates of using statistics as a social research method.

New Perspectives in Nuclear Structure International Spring Seminar on Nuclear Physics 1995, Ravello, Italy, Aldo Covello, 1996 This seminar focuses on recent achievements and new goals of nuclear structure in both experiment and theory. Several topics at the forefront of current research in this field are covered by major experts. The main themes are exotic nuclei, the present role and perspectives of the shell model, modes of excitation in deformed and superdeformed nuclei, and nuclear astrophysics. Publisher's website.
