Schaper, 2012-12-06 A Paulraj V Roychowdhury and C Schaper Dept of Electrical Engineering Stanford University Dept of Electrical Engineering UCLA Innumerable conferences are held around the world on the subjects of communications computation control and signal processing and on their numerous subdisciplines Therefore one might not envision a coherent conference encompassing all these areas However such an event did take place June 22-26 1995 at an international symposium held at Stanford University to celebrate Professor Thomas Kailath's sixtieth birthday and to honor the notable contributions made by him and his students and associates The depth of these contributions was evident from the participation of so many leading figures in each of these fields Over the five days of the meeting there were about 200 attendees from eighteen countries more than twenty government and industrial organizations and various engineering mathematics and statistics faculties at nearly 50 different academic institutions They came not only to celebrate but also to learn and to ponder the threads and the connections that Professor Kailath has discovered and woven among so many apparently disparate areas The organizers received many comments about the richness of the occasion A distinguished academic wrote of the conference being the single most rewarding professional event of my life The program is summarized in Table 1.1 a letter of reflections by Dr C Rohrs appears a little later

Understanding and Managing the Complexity of Healthcare William B. Rouse, Nicoleta Serban, 2014-07-03 An argument that understanding healthcare delivery as a complex adaptive system will help us design a system that yields better health outcomes Breakthroughs in medical science innovations in medical technologies and improvements in clinical practices occur today at an increasingly rapid rate Yet because of a fragmented healthcare delivery system many Americans are unable to benefit from these developments How can we design a system that can provide high quality affordable healthcare for everyone In this book William Rouse and Nicoleta Serban introduce concepts principles models and methods for understanding and improving healthcare delivery Approaching the topic from the perspectives of engineering and statistics they argue that understanding healthcare delivery as a complex adaptive system will help us design a system that is more efficient effective and equitable The authors use multilevel simulation models as a quantitative tool for evaluating alternate ways of organizing healthcare delivery They employ this approach for example in their discussions of affordability a prevention and wellness program chronic disease management and primary care accessibility for children in the Medicaid program They also consider possible benefits from a range of technologies including electronic health records and telemedicine data mining as an alternative to randomized trials conceptual and analytical methodologies that address the complexity of the healthcare system and how these principles models and methods can enable transformational change
