British Science Fiction Film and Television Tobias Hochscherf, James Leggott, Donald E. Palumbo, 2014-01-10 Written by international experts from a range of disciplines these essays examine the uniquely British contribution to science fiction film and television Viewing British SF as a cultural phenomenon that challenges straightforward definitions of genre nationhood authorship and media the editors provide a conceptual introduction placing the essays within their critical context Essay topics include Hammer science fiction films the various incarnations of Doctor Who Stanley Kubrick's *A Clockwork Orange* and such 21st century productions as *28 Days Later* and *Torchwood* *Living in a Microbial World* Bruce Hofkin, 2020-11-26

As with the first edition this second edition of *Living in a Microbial World* is written for students taking a general microbiology course or a microbiology based course for non science majors The conversational style and use of practical everyday examples make the essential concepts of microbiology accessible to a wide audience While using this approach the text maintains scientific rigor with clear explanations spanning the breadth of microbiology including health evolution ecology food production biotechnology and industrial processes Each chapter contains a series of case studies based on microbiology in the news in history and in literature There are questions at the end of each case study and the end of each chapter as well as an online quiz with help on answering the questions The text questions and cases have been updated to reflect the changing influence of microbiology in the world today from the microbiome to new disease outbreaks Ebola and Zika and antibiotic resistance to new biotechnology tools CRISPR Cas *Diseased Cinema* Robert Alpert, Merle Eisenberg, Lee Mordechai, 2023-09-29 Discusses how the depiction of diseases in movies has changed over the last century and what these changes reveal about American culture Examines disease movies as a genre that has emerged over the last century and includes pandemic and zombie films Reveals the changes to the genre's narratives over three broad time periods the beginning of film through the 1980s the 1990s through the mid 2000s and the late 2000s and afterward Investigates the evolution of disease movies through three perspectives historically notable films remakes and franchises Analyses disease movies in the context of the development of American global capitalism and the fragmentation of the social contract Explains the role of disease movie narratives in the American experience of Covid American movies about infectious diseases have reflected and driven dominant cultural narratives during the past century These movies both real pandemics and imagined zombie outbreaks have become wildly popular since the beginning of the 21st century They have shifted from featuring a contained outbreak to an imagined containment of a known disease to a globalized uncontrollable pandemic of an unknown

origin Movie narratives have changed from identifying and solving social problems to a despair and acceptance of America's failure to fulfil its historic social contract. Movies reflect and drive developments in American capitalism that increasingly advocates for individuals and their families rather than communities and the public good. Disease movies today minimize human differences and envisage a utopian new world order to advance the needs of contemporary American capitalism. These movie narratives shaped reactions to the outbreak of Covid and reinforced individual responsibility as the solution to end the pandemic.

Humanizing Pedagogy Through HIV and AIDS Prevention American Association of Colleges for Teacher Education, 2015-12-03. This book explores the power of educators to serve as HIV and AIDS prevention agents. The definitive text represents the work of a distinguished panel of teacher educators and health scientists who identify core information and skills effective educators of HIV and AIDS prevention should learn as they are prepared to attend to the academic and human needs of students. It assigns to teachers in the US and abroad the novel role of prevention agents given their extraordinary ability to access and affect young people to influence their behavior. Humanizing Pedagogy considers the social, economic, racial, gender, and other variables that impact the prevention of HIV and AIDS. The authors collectively assert that the process of preventing HIV and AIDS when it considers historic and social context can compel educators to serve not only as practitioners of knowledge but as community agents of health and well-being. Attending to HIV and AIDS issues advances the capacity and ability of educators to see and attend to the complete learner. Humanizing Pedagogy is a single volume resource for educators in the US and abroad interested in attending to the whole needs of the learner and saving lives.

Child's Play Sabine Frühstück, Anne Walthall, 2017-10-24. Few things make Japanese adults feel quite as anxious today as the phenomenon called the child crisis. Various media teem with intense debates about bullying in schools, child poverty, child suicides, violent crimes committed by children, the rise of socially withdrawn youngsters, and forceful moves by the government to introduce a more conservative educational curriculum. These issues have propelled Japan into the center of a set of global conversations about the nature of children and how to raise them. Engaging both the history of children and childhood and the history of emotions, contributors to this volume track Japanese childhood through a number of historical scenarios. Such explorations, some from Japan's early modern past, are revealed through letters, diaries, memoirs, family and household records, and religious polemics about promising, rambunctious, sickly, happy, and dutiful youngsters.

Films from the Future Andrew Maynard, 2018-11-15. Hard Science Fiction Films that Predict Future Technology. As the breakneck advance of technology takes us into a world that is both exciting and menacing, sci-fi films give us an inkling of what is to

,2007-09 Divining without Seeds Iruka N. Okeke,2011-02-15 Infectious disease is the most common cause of illness and death in Africa yet health practitioners routinely fail to identify causative microorganisms in most patients As a result patients often do not receive the right medicine in time to cure them promptly even when such medicine is available outbreaks are larger and more devastating than they should be and the impact of control interventions is difficult to measure Wrong prescriptions and prolonged infections amount to needless costs for patients and for health systems In Divining without Seeds Iruka N Okeke forcefully argues that laboratory diagnostics are essential to the effective practice of medicine in Africa The diversity of endemic life threatening infections and limited public health resources in tropical Africa make the need for basic laboratory diagnostic support even more acute than in other parts of the world This book gathers compelling case studies of inadequate diagnoses of diseases ranging from fevers including malaria to respiratory infections and sexually transmitted diseases The inherited and widely prevalent health clinic model which excludes or diminishes the hospital laboratory is flawed to often devastating effect Fortunately there are new technologies that make it possible to inexpensively implement testing at the primary care level Divining without Seeds makes clear that routine use of appropriate diagnostic support should be part of every drug delivery plan in Africa and that diagnostic development should be given high priority

Global Genres, Local Films Elena Oliete-Aldea, 2017-06-29 The acute processes of globalisation at the turn of the century have generated an increased interest in exploring the interactions between the so called global cultural products or trends and their specific local manifestations Even though cross cultural connections are becoming more patent in filmic productions in the last decades cinema per se has always been characterized by its hybrid transnational border crossing nature From its own inception Spanish film production was soon tied to the Hollywood film industry for its subsistence but other film traditions such as those in the Soviet Union France Germany and in particular Italy also determined either directly or indirectly the development of Spanish cinema Global Genres Local Films The Transnational Dimension of Spanish Cinema reaches beyond the limits of the film text and analyses and contextualizes the impact of global film trends and genres on Spanish cinema in order to study how they helped articulate specific national challenges from the conflict between liberalism and tradition in the first decades of the 20th century to the management of the contemporary financial crisis This collection provides the first comprehensive picture of the complex national and supranational forces that have shaped Spanish films revealing the tensions and the intricate dialogue between cross cultural aesthetic and narrative models on the one hand and indigenous traditions on the other as well as the political and historical contingencies these different expressions responded to
