

Stoichiometry questions (1)

Consider : $4\text{NH}_3 + 5\text{O}_2 \rightarrow 6\text{H}_2\text{O} + 4\text{NO}$

- How many moles of H_2O are produced if 0.176 mol of O_2 are used?

$$\# \text{ mol H}_2\text{O} = 0.176 \cancel{\text{ mol O}_2} \times \frac{6 \text{ mol H}_2\text{O}}{5 \cancel{\text{ mol O}_2}} = 0.2112 \text{ mol}$$

- How many moles of NO are produced in the reaction if 17 mol of H_2O are also produced?

$$\# \text{ mol NO} = 17 \cancel{\text{ mol H}_2\text{O}} \times \frac{4 \text{ mol NO}}{6 \cancel{\text{ mol H}_2\text{O}}} = 11.33 \text{ mol NO}$$

Notice that a correctly balanced equation is essential to get the right answer

Multiple Representations in Chemical Education John K. Gilbert,David Treagust,2009-02-28 Chemistry seeks to provide qualitative and quantitative explanations for the observed behaviour of elements and their compounds Doing so involves making use of three types of representation the macro the empirical properties of substances the sub micro the natures of the entities giving rise to those properties and the symbolic the number of entities involved in any changes that take place Although understanding this triplet relationship is a key aspect of chemical education there is considerable evidence that students find

great difficulty in achieving mastery of the ideas involved In bringing together the work of leading chemistry educators who are researching the triplet relationship at the secondary and university levels the book discusses the learning involved the problems that students encounter and successful approaches to teaching Based on the reported research the editors argue for a coherent model for understanding the triplet relationship in chemical education **Cracking the SAT Chemistry Subject Test** Princeton Review,2014-12-09 EVERYTHING YOU NEED TO HELP SCORE A PERFECT 800 Equip yourself to ace the SAT Chemistry Subject Test with The Princeton Review s comprehensive study guide including 3 full length practice tests thorough reviews of key chemistry topics and targeted strategies for every question type We don t have to tell you how tough SAT Chemistry is or how helpful a stellar exam score can be for your chances of getting into your top choice college Written by the experts at The Princeton Review Cracking the SAT Chemistry Subject Test arms you to take on the test and achieve your highest score Techniques That Actually Work Tried and true strategies to help you avoid traps and beat the test Tips for pacing yourself and guessing logically Essential tactics to help you work smarter not harder Everything You Need to Know for a High Score Expert subject reviews for every test topic Up to date information on the SAT Chemistry Subject Test Score conversion tables for accurate self assessment Practice Your Way to Perfection 3 full length practice tests with detailed answer explanations Hands on experience with all three question types in each content chapter Complete study sheet of core formulas and terms **Cracking the SAT Chemistry Subject Test, 15th Edition** Princeton Review,2015-02-17
