Everyday Lifestyles and Sustainability Fabricio Chicca, Brenda Vale, Robert Vale, 2018-04-09 The impact of humanity on the earth overshoots the earth s bio capacity to supply humanity s needs meaning that people are living off earth s capital rather than its income However not all countries

are equal and this book explores why apparently similar patterns of daily living can lead to larger and smaller environmental impacts The contributors describe daily life in many different places in the world and then calculate the environmental impact of these ways of living from the perspective of ecological and carbon footprints This leads to comparison and discussion of what living within the limits of the planet might mean Current footprints for countries are derived from national statistics and these hide the variety of impacts made by individual people and the choices they make in their daily lives This book takes a bottom up approach by calculating the footprints of daily living The purpose is to show that small changes in behaviour now could avoid some very challenging problems in the future Offering a global perspective on the question of sustainable living this book will be of great interest to anyone with a concern for the future as well as students and researchers in environmental studies human geography and development studies

Human-Automation Interaction Design Jediah R. Clark, Neville A. Stanton, Kirsten Revell, 2021-10-21 This text presents a four step approach for applying communicative concepts to driving automation including scoping piloting designing and testing It further provides experimental data on how practical human human communication strategies can be applied to interaction in automated vehicles The book explores the role of communication and the nature of situation awareness in automated vehicles to ensure safe and usable automated vehicle operation It covers the issue of interaction in automated vehicles by providing insight into communicative concepts the transfer of control in human teams and how these concepts can be applied in automated vehicles The theoretical framework is built on by presenting experimental findings design workshop output and providing a demonstration of prototype generation for automated assistants that addresses a wide range of performance outcomes within human machine interaction Aimed at professionals graduate students and academic researchers in the fields of ergonomics automotive engineering transportation engineering and human factors this text Discusses experimental findings on how practical human human communication strategies can be applied to interaction in automated vehicles Provides a four step approach for applying communicative concepts to driving automation including scoping piloting designing and testing Explores the role of distributed situation awareness in automated vehicles Covers communication and system awareness in response to multiple complex road scenarios Provides design guidelines for automation human handover design

The Chinese Space Programme in the Public Conversation about Space Andrew Thomas, 2020-08-01 This study is the product of a long view

of space exploration and the conversations about space in China It locates the multiple conversations about space exploration and utilisation as they are in the Peoples Republic of China PRC within other conversations about space culture in the world China is viewed by Western researchers through many lenses which are examined here critically In previous studies writers explain away China s space programme with the easy answers of a Space Race and a China Threat in which the space programme is seen as merely an example of global competition or threat but this thesis challenges those barriers to Western understanding of the Chinese public conversation of space culture In this study critical theory and an underlying epistemology within a post Enlightenment cultural frame are applied to official archival and ephemeral texts and images The manner of the critical application is distinguished from derivative techniques operationalised as Open Source Intelligence The concept of Place and within that Foucault s linguistic concept of Heterotopia is significant both in understanding the Chinese overseas space bases on Earth and the temporal and spatial dislocations experienced in space missions In acknowledging the interpretative approach an empirical study a Q sort has been carried out which demonstrates that the key factor in the Chinese conversation is Science within the context of modernisation tempered by Chinese cultural affirmation and international co operation The thesis concludes by providing general principles in future work for successful research into the popular culture of space exploration

Post-Truth James Ball, 2017-05-11 2016 marked the birth of the post truth era Sophistry and spin have coloured politics since the dawn of time but two shock events the Brexit vote and Donald Trump s elevation to US President heralded a departure into murkier territory From Trump denying video evidence of his own words to the infamous Leave claims of 350 million for the NHS politics has rarely seen so many stretching the truth with such impunity Bullshit gets you noticed Bullshit makes you rich Bullshit can even pave your way to the Oval Office This is bigger than fake news and bigger than social media It s about the slow rise of a political media and online infrastructure that has devalued truth This is the story of bullshit what s being spread who s spreading it why it works and what we can do to tackle it

Designing Interaction and Interfaces for Automated Vehicles Neville Stanton, Kirsten M. A. Revell, Patrick Langdon, 2021-03-10 Driving automation and autonomy are already upon us and the problems that were predicted twenty years ago are beginning to appear These problems include shortfalls in expected benefits equipment unreliability driver skill fade and error inducing equipment designs

Designing Interaction and Interfaces for Automated Vehicles User Centred Ecological Design and Testing investigates the difficult problem of how to interface drivers with automated vehicles by offering an inclusive human centred design process that focusses on human variability and capability in interaction with interfaces This book introduces a novel method that combines both systems thinking and inclusive user centred design It models driver interaction provides design specifications concept designs and the results of studies in simulators on the test track and in road going vehicles This book is for designers of systems interfaces interactions UX Human Factors and Ergonomics researchers and practitioners involved with systems engineering and automotive academics _ In this book Prof

Stanton and colleagues show how Human Factors methods can be applied to the tricky problem of interfacing human drivers with vehicle automation They have developed an approach to designing the human automation interaction for the handovers between the driver and the vehicle This approach has been tested in driving simulators and most interestingly in real vehicles on British motorways The approach called User Centred Ecological Interface Design has been validated against driver behaviour and used to support their ongoing work on vehicle automation I highly recommend this book for anyone interested or involved in designing human automation interaction in vehicles and beyond Professor Michael A Regan University of NSW Sydney AUSTRALIA
